

Investment Objective

The Aspiriant Defensive Allocation Fund ("RMDFX" or the "Fund") seeks to achieve long-term investment returns with lower risk and lower volatility than the stock market, and with relatively low correlation to stock and bond market indexes.

Description

- The Fund seeks to mitigate capital losses in periods of market dislocation, and generate moderate returns in flat or rising markets.
- The Fund is a "fund of funds¹" that invests in managers that employ both traditional and alternative strategies to diversify risk and capture returns with less sensitivity to movements in stock and/or bond indices.
- Over a complete market cycle, the Fund seeks to achieve an investment return that is equal to or greater than (i) a cash rate (90-day Treasury Bill) plus 2% to 4% and (ii) the HFRI Fund of Funds Composite Index.

Fund Performance Comparison and Summary

As of 6/30/2018

RMDFX generated a net investment return of -1.30% during the second quarter, underperforming its benchmark, the HFRI Fund of Funds Composite Index, which gained 0.88%.

Core Diversifiers and Alternative Diversifiers each detracted from performance, down -1.42% and -1.11%, respectively. A stronger dollar and escalating trade tensions hurt our international exposures in both sets of strategies during the quarter.

During the last three months, we adjusted our Core Diversifier holdings and made an investment in the All Weather Portfolio Limited ("All Weather"). All Weather is managed by Bridgewater Associates, LP, a manager with a 40 year track record. All Weather invests across a range of global asset classes including nominal bonds, credit, equities and inflation sensitive assets (e.g., commodities and inflation-linked bonds). All Weather seeks to maintain balanced risk allocations across the portfolio and generate returns that are more resilient to a variety of changing economic conditions. To establish the investment in All Weather, RMDFX exited the FPA Crescent Fund and the iShares Core Growth Allocation ETF. At quarter-end, the Fund's allocation to Core Diversifiers represented approximately 61% of the Fund's exposures with the remaining 39% allocated to Alternative Diversifiers.

	Q2	YTD	1 Year	Annualized		
				2 Years	3 Years	Since Inception*
RMDFX	-1.30%	-1.30%	3.06%	4.99%	TBD	3.65%
HFRI Fund of Funds Composite Index	0.88%	1.15%	5.62%	6.05%	TBD	3.45%

* The Fund's inception date is 12/14/2015.

The performance data quoted represents past performance and is not a guarantee of future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance information quoted. To obtain performance information current to the most recent month-end, please call 1.877.997.9971.

Investment Strategies

Core Diversifiers are global asset allocation strategies that invest across the full risk spectrum and tend to hold long-only positions. These strategies, and underlying managers, have proven track records of managing risk and shifting exposures to enhance the risk/reward characteristics of the portfolio. Exposures to these strategies are managed with an annualized return objective equal to a cash return plus 4% over a complete market cycle.

Alternative Diversifiers² are investments in strategies that exhibit less systematic risk and with historical returns that are less correlated to movements in the equity and bond markets. Exposures to these strategies are managed with an annualized return objective equal to a cash return plus 2% over a complete market cycle.

Risk Management

Core Diversifiers manage risk by evaluating and allocating capital across the full risk spectrum. As the investment environment changes, these strategies dynamically shift exposures between lower volatility asset classes (e.g., cash, investment grade bonds) and more opportunistic investments (e.g., small capitalization equities, emerging market equities) in an attempt to generate higher risk-adjusted returns.

Alternative Diversifiers maintain flexibility to take long and/or short positions to isolate and capture returns that have less correlation to changes in the equity or bond markets. By fully or partially offsetting unwanted or undesirable risk exposures, these strategies reduce portfolio volatility and dampen the likelihood of a permanent impairment of capital.

Overall Portfolio risk management is also undertaken as the opportunity set for risky assets changes. As our outlook for risky assets improves, we expect to increase the portfolio weight to Core Diversifiers. Conversely, the allocation to Alternative Diversifiers (and potentially to cash) would increase when we expect the environment and return opportunity for risky assets to deteriorate.

Fund Fact Sheet

MORE INFORMATION

1.877.997.9971 aspiriantfunds.com

Please consider the Fund's investment objectives, risks, charges and expenses carefully before investing. The prospectus that contains this and other information about the Fund is available by calling 1.877.997.9971 and should be read carefully prior to investing.

Portfolio composition will change due to ongoing management of the Fund. References to specific securities should not be construed as a recommendation by the Fund, the adviser or distributor.

An investment in the Fund is subject to risks, and you could lose money on your investment in the Fund. There is no guarantee that the Fund will achieve its investment objective. The cost of investing in a fund of funds may be higher than other mutual funds as the Fund will bear not only its own direct expenses but also a portion of expenses of the underlying funds. The Fund's performance is tied to the performance of the underlying funds which means that if one or more of the underlying funds fails to meet its objective then the performance of the Fund may be adversely impacted.

The Fund's asset allocation percentages are made across a broad range of investment strategies which may expose investors to increased risks. This may include investing significant portions of assets in certain asset classes and industries within certain economic sectors which may be unfavorably affected by the same political, economic or market events. The Fund may invest in illiquid securities, which may or may not be sold or disposed of in the ordinary course of business.

As a result of its investments in underlying funds, the Fund is exposed to the principal risks of underlying funds. These risks include alternative strategies, asset-backed and mortgage-backed securities, call, commodity, counterparty, covered calls and equity collars, credit, defaulted securities, derivatives, emerging markets, extension, floating rate loan, foreign securities and currencies, high yield securities, income, interest rate, inverse floaters, large shareholder, leverage, preferred securities, prepayment, REIT and real estate, restricted securities, sector, short sale, small and mid-cap company and zero coupon bond risks. Further information about these and other risks may be found in the prospectus.

The below referenced, unmanaged index does not reflect the deduction of fees and taxes associated with a mutual fund, such as investment management and fund accounting fees. Investors cannot invest directly in an index, although they can invest in their underlying securities.

The HFRI Fund of Funds Composite Index is an uninvestable, unmanaged index that is an equal weighted index of over 800 constituent hedge fund of funds that invest over a broad range of strategies.

¹ The underlying investments may include unaffiliated mutual funds, ETFs, and private funds, as well as separately managed accounts.

² These strategies may invest in derivatives (e.g., futures, forwards, swaps or swaptions). A derivative is a contract whose value is based on (or derived from) the performance of an underlying financial asset, index, rate, instrument or economic measure.

³ The investment manager of All Weather is Bridgewater Associates, LP.

⁴ Weights are based off the Fund's total investments, excluding cash and cash equivalents.

⁵ Anticipated average allocations over complete market cycle.

⁶ Excludes cash and cash equivalents.

⁷ As of 7/1/2018.

⁸ The SEC 30-Day Yield is computed under an SEC standardized formula and is based on the most recent trailing 30-day period. The Fund's actual distribution rate will differ from the SEC yield, and any income distributions from the Fund may be higher or lower than the SEC yield.

Distribution Rate on NAV is the latest declared annual distribution per share, divided by NAV per share, as of 12/31/2017. Distributions may be paid from sources other than ordinary income, such as short-term capital gains, long-term capital gains or return of capital.

Aspiriant Defensive Allocation Fund is distributed by UMB Distribution Services, LLC.
