

ASPIRIANT

PROSPECTUS

August 1, 2023

Aspiriant Risk-Managed Real Assets Fund

Aspiriant Risk-Managed Real Assets Fund (the "Fund") (formerly known as Aspiriant Risk-Managed Real Asset Fund) is a Delaware statutory trust registered under the Investment Company Act of 1940, as amended (the "Investment Company Act"), as a non-diversified, closed-end management investment company. The Fund operates under an Agreement and Declaration of Trust dated October 26, 2020 (the "Declaration of Trust"). Aspiriant, LLC serves as the investment adviser (the "Investment Manager") of the Fund. The Investment Manager is an investment adviser registered with the Securities and Exchange Commission (the "SEC") under the Investment Advisers Act of 1940, as amended.

The investment objective of the Fund is to seek long term capital appreciation. The Fund is a "fund of funds" that intends to invest primarily in general or limited partnerships, U.S. and foreign funds (including open-end funds, closed-end funds and exchange-traded funds), corporations, trusts or other investment vehicles (collectively, "Investment Funds") that invest substantially all their assets in real estate, infrastructure, commodities and other real asset securities and funds. Under normal circumstances, the Fund intends to invest at least 80% of its net assets in Investment Funds that hold equity, debt and other economic interests in real assets or real asset companies. The Fund cannot guarantee that its investment objective will be achieved or that its strategy of investing in the Investment Funds will be successful. **SEE "PRINCIPAL RISK FACTORS" BEGINNING ON PAGE 11.**

This Prospectus (the "Prospectus") applies to the offering of shares of beneficial interest ("Shares") of the Fund. The Fund commenced the public offering of the Shares in April 2021 and has publicly offered shares since that time. The Shares will generally be offered as of the first business day of each calendar quarter or at such other times as may be determined by the Fund, in each case subject to any applicable sales charges and other fees, as described herein. The Shares will be issued at net asset value per Share. The Fund has registered \$300,000,000 for sale under the registration statement to which this Prospectus relates. No holder of the Fund's Shares (each, a "Shareholder" and collectively, "Shareholders") will have the right to require the Fund to redeem its Shares.

This Prospectus concisely provides information that you should know about the Fund before investing. You are advised to read this Prospectus carefully and to retain it for future reference. Additional information about the Fund, including the Fund's statement of additional information (the "SAI"), dated August 1, 2023, has been filed with the SEC. You may also request a free copy of this Prospectus, the SAI, the Fund's annual and semi-annual reports and other information about the Fund, and make inquiries without charge by writing to the Fund, c/o UMB Fund Services, Inc., 235 West Galena Street, Milwaukee, WI 53212, by calling the Fund toll-free at (877) 997-9971 or by accessing the Fund's website at <https://aspiriantfunds.com/aspiriant-risk-managed-real-assets-fund>. The information on the Fund's website is not incorporated by reference into this Prospectus and investors should not consider it a part of this Prospectus. The SAI is incorporated by reference into this Prospectus in its entirety. You can obtain the SAI, annual and semi-annual reports of the Fund, and other information about the Fund on the SEC's website at <https://www.sec.gov>. The address of the SEC's internet site is provided solely for the information of prospective investors and is not intended to be an active link.

Shares are an illiquid investment.

- You should generally not expect to be able to sell your Shares (other than through the repurchase process), regardless of how the Fund performs.
- Although the Fund has implemented a Share repurchase program, only a limited number of Shares will be eligible for repurchase by the Fund.
- If you are permitted to sell your Shares to a third party rather than through the repurchase process, you may receive less than your purchase price.
- The Fund does not intend to list the Shares on any securities exchange and the Fund does not expect a secondary market in the Shares to develop.
- You should consider that you may not have access to the money you invest for an indefinite period of time.
- An investment in the Shares is not suitable for you if you need foreseeable access to the money you invest.
- Because you will be unable to sell your Shares or have them repurchased immediately, you will find it difficult to reduce your exposure on a timely basis during a market downturn.

Total Offering⁽¹⁾

	Price to Public	Sales Charge Load ⁽²⁾	Proceeds to Fund ⁽³⁾
Shares	Current Net Asset Value	0.00%	\$400,000,000

⁽¹⁾ UMB Distribution Services, LLC (the "Distributor") acts as the principal underwriter of the Fund's Shares on a best-efforts basis. The Shares are being offered through the Distributor and may also be offered through other brokers or dealers that have entered into selling agreements with the Distributor. The Distributor does not receive compensation from the Fund for its distribution services and the Investment Manager pays the Distributor a fee for certain distribution-related services. The Investment Manager and/or its affiliates may make payments to selected affiliated or unaffiliated third parties (including the parties who have entered into selling agreements with the Distributor) from time to time in connection with the distribution of Shares and/or the servicing of Shareholders and/or the Fund. These payments will be made out of the Investment Manager's and/or affiliates' own assets and will not represent an additional charge to the Fund. The amount of such payments may be significant in amount and the prospect of receiving any such payments may provide such third parties or their employees with an incentive to favor sales of Shares of the Fund over other investment options. See "DISTRIBUTOR." The Fund will sell Shares only to investors who certify that they are "Eligible Investors." See "INVESTOR QUALIFICATIONS." The minimum initial investment in the Fund by any investor is \$25,000. However, the Fund, in its sole discretion, may accept investments below this minimum. Pending any closing, funds received from prospective investors will be placed in an interest-bearing escrow account with UMB Bank, n.a., the Fund's escrow agent. On the date of any closing, the balance in the escrow account with respect to each investor whose investment is accepted will be invested in the Fund on behalf of such investor. Any interest earned on escrowed amounts will be credited to the Fund. See "Fund Summary - The Offering."

⁽²⁾ The Shares are not subject to a "sales load," as defined in the Investment Company Act. See "DISTRIBUTOR."

⁽³⁾ The Fund's offering expenses are described under "FUND FEES AND EXPENSES" below.

Neither the SEC nor any state securities commission has determined whether this Prospectus is truthful or complete, nor have they made, nor will they make, any determination as to whether anyone should buy these securities. Any representation to the contrary is a criminal offense.

You should not construe the contents of this Prospectus and the SAI as legal, tax or financial advice. You should consult with your own professional advisers as to legal, tax, financial, or other matters relevant to the suitability of an investment in the Fund.

You should rely only on the information contained in this Prospectus. The Fund has not authorized anyone to provide you with different information. You should not assume that the information provided by this Prospectus is accurate as of any date other than the date shown below.

THE FUND'S PRINCIPAL UNDERWRITER IS UMB DISTRIBUTION SERVICES, LLC.

The date of this Prospectus is August 1, 2023

Aspiriant Risk-Managed Real Asset Fund

FUND SUMMARY

This is only a summary and does not contain all of the information that investors should consider before investing in the Fund. Investors should review the more detailed information appearing elsewhere in this Prospectus and SAI, especially the information set forth under the heading “Principal Risk Factors.”

The Fund and the Shares

Aspiriant Risk-Managed Real Assets Fund (the “Fund”) (formerly known as Aspiriant Risk-Managed Real Asset Fund) is a closed-end management investment company registered under the Investment Company Act of 1940, as amended (the “Investment Company Act”) and organized as a Delaware statutory trust on October 26, 2020. Aspiriant, LLC serves as the investment adviser (the “Investment Manager”) of the Fund. The Investment Manager provides day-to-day investment management services to the Fund. The Fund is non-diversified, which means that under the Investment Company Act, it is not limited in the percentage of its assets that it may invest in any single issuer of securities. **The Fund is an appropriate investment only for those investors who can tolerate a high degree of risk and do not require a liquid investment.**

As of November 1, 2021, the Fund no longer qualifies as a regulated investment company (“RIC”) under Subchapter M of Subtitle A, Chapter 1 (“Subchapter M”) of the Internal Revenue Code of 1986, as amended (the “Code”) for the taxable years ending October 31, 2022 and October 31, 2023. Therefore, the Fund’s taxable income will be subject to tax at corporate rates for these years without any deduction for distributions to shareholders. In addition, distributions during these taxable years generally will be taxable as ordinary income to shareholders to the extent of the Fund’s current or accumulated earnings and profits. If the shareholder has held the Fund’s shares for more than 60 days during the 121-day period that begins 60 days before the ex-dividend date, such dividends will generally be eligible to be treated as qualified dividend income, which is generally taxed at a maximum federal income tax rate of 20% (plus 3.8% net investment income tax for Shareholders with income in excess of certain thresholds). Any so-called “return of capital” dividends (dividends that are not paid from the Fund’s current or accumulated earnings and profits) are generally not taxable but do reduce the Shareholder’s tax basis in the Fund shares. The tax consequences described above will apply for the Fund’s tax years ending October 31, 2022 and October 31, 2023 as well as any future year in which the Fund does not qualify as a RIC. The Fund intends to qualify as a RIC, effective November 1, 2023, and continue to operate as a RIC. If the Fund fails to qualify as a RIC for its taxable year ending October 31, 2024, it may be liable for a built-in gains tax in a future year when it does qualify as a RIC.

The Fund intends to qualify as a RIC in future tax years, which generally requires that, at the end of each quarter: (1) at least 50% of the Fund’s total assets are invested in (i) cash and cash items (including receivables), Federal Government securities and securities of other RICs; and (ii) securities of separate issuers, each of which amounts to no more than 5% of the Fund’s total assets (and no more than 10% of the issuer’s outstanding voting shares), and (2) no more than 25% of the Fund’s total assets are invested in (i) securities (other than Federal Government securities or the securities of other RICs) of any one issuer; (ii) the securities (other than the securities of other regulated investment companies) of two or more issuers which the taxpayer controls and which are engaged in the same or similar trades or businesses; or (iii) the securities of one or more qualified publicly traded partnerships. To continue to qualify as a RIC, the Fund must also satisfy other applicable requirements, including restrictions on the kinds of income that the Fund can earn and requirements that the Fund distribute most of its income to shareholders each year.

Investment Objective and Strategies

The investment objective of the Fund is long term capital appreciation. The Fund intends to invest primarily in general or limited partnerships, U.S. and foreign funds (including open-end funds, closed-end funds and exchange-traded funds), corporations, trusts or other investment vehicles ("Investment Funds") that invest substantially all their assets in real estate, infrastructure, commodities and other real asset securities and funds. There can be no assurance that the Fund will achieve its investment objective.

The Investment Manager

As Investment Manager, Aspiriant, LLC provides day-to-day investment management services to the Fund. Its principal place of business is located at 11100 Santa Monica Blvd., Suite 600, Los Angeles, California 90025. The Investment Manager is registered as an investment adviser with the SEC under the Investment Advisers Act of 1940, as amended (the "Advisers Act"). As of May 31, 2023 approximately \$13 billion of assets were under the management of the Investment Manager and its affiliates.

The Administrator

The Fund has retained UMB Fund Services, Inc. (the "Administrator") to provide it with certain administrative services, including performing all actions related to the issuance and repurchase of Shares of the Fund. The Fund compensates the Administrator for these services and reimburses the Administrator for certain of its out-of-pocket expenses. See "Fees and Expenses" below.

Fees and Expenses

The Fund bears its own operating expenses (including, without limitation, its offering expenses not paid by the Investment Manager). A more detailed discussion of the Fund's expenses can be found under "FUND EXPENSES."

Investment Management Fee. The Investment Manager is entitled to a management fee (the "Investment Management Fee") calculated at an annual rate of 0.50%, payable quarterly in arrears, based upon the Fund's net assets as of quarter-end. The Investment Manager, however, has entered into an investment management fee limitation agreement (the "Management Fee Limitation Agreement") with the Fund, whereby the Investment Manager has agreed to waive 0.40% of its Investment Management Fee. The Management Fee Limitation Agreement became effective for one year following the Commencement of Operations and automatically renews for consecutive one-year terms thereafter (each, a "Current Term"). Neither the Fund nor the Investment Manager may terminate the Management Fee Limitation Agreement during a Current Term. The Investment Management Fee is paid to the Investment Manager before giving effect to any repurchase of Shares in the Fund effective as of that date and will decrease the net profits or increase the net losses of the Fund that are credited to its Shareholders.

Administrative Services Fee. Pursuant to an administrative services agreement with the Fund, the Investment Manager is entitled to a fee calculated at an annual rate of 0.10%, payable quarterly in arrears, based upon the Fund's net assets as of quarter-end for providing administrative services to the Fund. Such services include the review of shareholder reports and other filings with the SEC; oversight of the Fund's primary service providers; periodic due diligence reviews of the Fund's primary service providers; coordination and negotiation of all of the contracts and pricing relating to the Fund's primary service providers, with the advice of Fund counsel; providing information to the Board relating to the review and selection of the Fund's primary service providers; and all such other duties or services necessary for the appropriate administration of the Fund that are incidental to the foregoing services. See "ADMINISTRATIVE SERVICES AGREEMENT."

Administration Fee. The Fund pays the Administrator an annual fee beginning at 0.04% of the Fund's net assets and decreasing as net assets reach certain levels.

In consideration for these services, the Fund pays the Administrator a minimum quarterly administration fee of \$12,500, or \$50,000 on an annualized basis (the "Administration Fee"). The Administration Fee is paid to the Administrator out of the assets of the Fund and therefore decreases the net profits or increases the net losses of the Fund. The Administrator also is reimbursed by the Fund for out-of-pocket expenses relating to services provided to the Fund and receives a fee for transfer agency services. The Administration Fee and the other terms of the Administration Agreement may change from time to time as may be agreed to by the Fund and the Administrator.

Fees of Underlying Managers

As an investor in the Investment Funds, the Fund will indirectly bear asset-based fees and performance-based fees or allocations charged by the investment advisers to the Investment Funds (the "Underlying Managers"). Such fees and performance-based compensation are in addition to the fees that are charged by the Investment Manager to the Fund and allocated to the Fund. Generally, fees payable to Underlying Managers of the private Investment Funds will range from 0.00% to 2.00% (annualized) of the average net asset value ("NAV") of the Fund's investment. In addition, certain Underlying Managers charge an incentive allocation or fee generally ranging from 0.00% to 20.00% of a private Investment Fund's net profits, although it is possible that such ranges may be exceeded for certain Underlying Managers. An investor in the Fund bears a proportionate share of the expenses of the Fund.

Investor Qualifications

Each prospective investor in the Fund will be required to certify that it is an "accredited investor" within the meaning of Rule 501 under the Securities Act of 1933, as amended (the "Securities Act"). The criteria for qualifying as an "accredited investor" are set forth in the investor application that must be completed by each prospective investor. Investors who meet such qualifications are referred to in this Prospectus as "Eligible Investors." Existing Shareholders who request to purchase additional Shares (other than in connection with the DRIP (as defined below)) will be required to qualify as Eligible Investors and to complete an additional investor application prior to the additional purchase.

Shares are only available to the Investment Manager's clients, charitable organizations that the Investment Manager's clients wish to designate as recipients of shares, the Investment Manager's current employees, current employees joint accounts and revocable trusts with their spouse, current and former owners of the Investment Manager including their joint accounts and revocable trusts with their spouse, members of the Investment Manager's board, and members of the Board of Trustees of the Fund (the "Board").

The Offering

The minimum initial investment in the Fund by any investor is \$25,000, and the minimum additional investment in the Fund by any Shareholder is \$10,000. However, the Fund, in its sole discretion, may accept investments below these minimums.

Shares will generally be offered for purchase as of the first business day of each calendar quarter, except that Shares may be offered more or less frequently as determined by the Board of Trustees of the Fund (the "Board") in its sole discretion. Once a prospective investor's purchase order is received, a confirmation is sent to the investor. Potential investors should send subscription funds by wire transfer pursuant to instructions provided to them by the Fund.

Subscriptions are generally subject to the receipt of cleared funds on or prior to the acceptance date set by the Fund and notified to prospective investors. Pending any closing, funds received from prospective investors will be placed in an interest-bearing escrow account with UMB Bank, n.a., the Fund's escrow agent. On the date of any closing, the balance in the escrow account with respect to each investor whose investment is accepted will be invested in the Fund on behalf of such investor. Any interest earned on escrowed amounts will be credited to the Fund for the benefit of all Shareholders.

A prospective investor must submit a completed investor application on or prior to the acceptance date set by the Fund. The Fund reserves the right to reject, in its sole discretion, any request to purchase Shares in the Fund at any time. The Fund also reserves the right to suspend or terminate offerings of Shares at any time at the Board's discretion. Additional information regarding the subscription process is set forth under "Investor Qualifications."

Distribution Policy

Distributions will be paid at least annually on the Shares in amounts representing substantially all of the net investment income and net capital gains, if any, earned each year. The Fund is not a suitable investment for any investor who requires regular dividend income.

Each Shareholder whose Shares are registered in its own name will automatically be a participant under the Fund's dividend reinvestment program (the "DRIP") and have all income dividends and/or capital gains distributions automatically reinvested in Shares unless such Shareholder, at any time, specifically elects to receive income dividends and/or capital gains distributions in cash. The Fund reserves the right to cap the aggregate amount of any income dividends and/or capital gain distributions that are made in cash (rather than being reinvested) at a total amount of not less than 20% of the total amount distributed to Shareholders. In the event that Shareholders submit elections in aggregate to receive more than the cap amount of such a distribution in cash, any such cap amount will be pro-rated among those electing Shareholders.

Repurchase Offers

At the discretion of the Board and provided that it is in the best interests of the Fund and Shareholders to do so, the Fund intends to provide a limited degree of liquidity to the Shareholders by conducting repurchase offers generally quarterly with a Valuation Date (as defined below) on or about March 31, June 30, September 30 and December 31 of each year. In each repurchase offer, the Fund may offer to repurchase its Shares at their NAV as determined as of approximately March 31, June 30, September 30 and December 31, of each year, as applicable (each, a "Valuation Date"). **Each repurchase offer ordinarily will be limited to the repurchase of approximately 5% of the Shares outstanding, but if the value of Shares tendered for repurchase exceeds the value the Fund intended to repurchase, the Fund may determine to repurchase less than the full number of Shares tendered. In such event, Shareholders will have their Shares repurchased on a pro rata basis, and tendering Shareholders will not have all of their tendered Shares repurchased by the Fund.** Shareholders tendering Shares for repurchase will be asked to give written notice of their intent to do so by the date specified in the notice describing the terms of the applicable repurchase offer. See "*TENDER OFFERS/OFFERS TO REPURCHASE*."

Risk Factors

The Fund is subject to substantial risks — including market risks, strategy risks and Underlying Manager risks. Investment Funds generally will not be registered as investment companies under the Investment Company Act and, therefore, the Fund will not be entitled to the various protections afforded by the Investment Company Act with respect to its investments in Investment Funds. While the Investment Manager will attempt to moderate any risks of securities activities of the Underlying Managers, there can be no assurance that the Fund's investment activities will be successful or that the Shareholders will not suffer losses. The Investment Manager will not have any control over the

Underlying Managers, thus there can be no assurances that an Underlying Manager will manage its Investment Funds in a manner consistent with the Fund’s investment objective. There may also be certain conflicts of interest relevant to the management of the Fund, arising out of, among other things, activities of the Investment Manager, its affiliates and employees with respect to the management of accounts for other clients as well as the investment of proprietary assets. Prospective investors should review carefully the “PRINCIPAL RISK FACTORS” section of this Prospectus. An investment in the Fund should only be made by investors who understand the risks involved and who are able to withstand the loss of the entire amount invested.

Accordingly, the Fund should be considered a speculative investment, and you should invest in the Fund only if you can sustain a complete loss of your investment. Past results of the Investment Manager, its principals, the Fund or the Underlying Managers are not indicative of future results. See “PRINCIPAL RISK FACTORS.”

Summary of Taxation

As of November 1, 2021, the Fund no longer qualifies as a RIC under Subchapter M of the Code for the taxable years ending October 31, 2022 and October 31, 2023. Therefore, the Fund’s taxable income will be subject to tax at corporate rates for these years without any deduction for distributions to shareholders. In addition, distributions during these taxable years generally will be taxable as ordinary income to shareholders to the extent of the Fund’s current or accumulated earnings and profits. If the shareholder has held the Fund’s shares for more than 60 days during the 121-day period that begins 60 days before the ex-dividend date, such dividends will generally be eligible to be treated as qualified dividend income, which is generally taxed at a maximum federal income tax rate of 20% (plus 3.8% net investment income tax for Shareholders with income in excess of certain thresholds). Any so-called “return of capital” dividends (dividends that are not paid from the Fund’s current or accumulated earnings and profits) are generally not taxable but do reduce the Shareholder’s tax basis in the Fund shares. The tax consequences described above will apply for the Fund’s tax years ending October 31, 2022 and October 31, 2023 as well as any future year in which the Fund does not qualify as a RIC. The Fund intends to qualify as a RIC, effective November 1, 2023, and continue to operate as a RIC. If the Fund fails to qualify as a RIC for its taxable year ending October 31, 2024, it may be liable for a built-in gains tax in a future year when it does qualify as a RIC. If the Fund requalifies as a RIC, the Fund will generally not be subject to federal corporate income taxes, provided that it distributes out to Shareholders their taxable income and gain each year.

The Investment Funds may be subject to taxes, including withholding taxes, attributable to investments of the Investment Funds. U.S. investors in the Fund are generally not expected to be entitled to a foreign tax credit with respect to any of those taxes. The Fund may also invest, either directly or indirectly through Subsidiaries (defined below), in private Investment Funds treated as partnerships for U.S. tax purposes. See “TAXES.”

FUND FEES AND EXPENSES

The following tables describe the aggregate fees and expenses that the Fund expects to incur and that the Shareholders can expect to bear, either directly or indirectly, through the Fund’s investments.

TRANSACTION EXPENSES:

Maximum Sales Charge (Load) (as a percentage of subscription amount)	None
Maximum Early Repurchase Fee (as a percentage of repurchased amount)	None

**ANNUAL EXPENSES***(As a Percentage of Net Assets Attributable to Shares)⁽¹⁾*

Investment Management Fee⁽²⁾	0.50%
Other Expenses	0.51%
Income Tax Expense⁽³⁾	0.71%
Acquired Fund Fees and Expenses⁽⁴⁾	2.32%
Total Annual Expenses⁽⁵⁾	4.04%
Less: Management Fee Waiver⁽⁶⁾	(0.40)%
Net Annual Expenses⁽⁵⁾	3.64%

⁽¹⁾ This table summarizes the expenses of the Fund and is designed to help investors understand the costs and expenses they will bear, directly or indirectly, by investing in the Fund.

⁽²⁾ For its provision of advisory services to the Fund, the Investment Manager is entitled to an annual Investment Management Fee equal to 0.50% of the Fund's net assets determined as of quarter-end, payable quarterly in arrears. The Investment Management Fee will be calculated before giving effect to any repurchase of Shares in the Fund effective as of that date and will decrease the net profits or increase the net losses of the Fund that are credited to its Shareholders.

⁽³⁾ Represents corporate income tax expense derived from income and capital gains for the taxable year ended October 31, 2022. Income Tax Expense for the taxable year ended October 31, 2022 was reimbursed by the Investment Manager. During "Non-Qualifying Years" (see "TAXES"), the Income Tax Expense may vary greatly from year to year depending on the nature of the Fund's investments, investment transactions, expenses of the Fund and general market conditions.

⁽⁴⁾ In addition to the Fund's direct expenses, the Fund indirectly bears a pro-rata share of the expenses of the Investment Funds. Private Investment Funds generally charge, in addition to management fees calculated as a percentage of the average net asset value ("NAV") of the Fund's investment, performance-based fees generally from 0% to 20% of the net capital appreciation in the Fund's investment for the year or other measurement period, subject to loss carryforward provisions, as defined in the respective Investment Funds' agreements. In the future, these fees and expenses may be substantially higher or lower than reflected, because certain fees are based on the performance of the Underlying Managers (Investment Funds), which fluctuate over time. In addition, the Fund's portfolio changes from time to time, which will result in different Acquired Fund Fees and Expenses.

⁽⁵⁾ Total and Net Annual Expenses in this table may not correlate to the gross and net ratios of expenses to average net assets provided in the Financial Highlights section of this prospectus, which reflects the operating expenses of the Fund and does not include Acquired Fund Fees and Expenses or voluntary Investment Manager Reimbursement of Income Tax Expense.

⁽⁶⁾ The Investment Manager has entered into an investment management fee limitation agreement (the "Management Fee Limitation Agreement") with the Fund, whereby the Investment Manager has agreed to waive 0.40% of its Investment Management Fee on an annualized basis. The Management Fee Limitation Agreement became effective for one year following the Commencement of Operations and automatically renews for consecutive one-year terms thereafter (each a "Current Term"). Neither the Fund nor the Investment Manager may terminate the Management Fee Limitation Agreement during a Current Term.

The purpose of the table above is to assist prospective investors in understanding the various fees and expenses Shareholders will bear directly or indirectly. "Other Expenses," as shown above, is an estimate based on anticipated investments in the Fund and anticipated expenses for the current fiscal year of the Fund's operations, and includes, among other things, professional fees and other expenses that the Fund will bear, including initial and ongoing offering

costs and fees and expenses of the Administrator, escrow agent and custodian. For a more complete description of the various fees and expenses of the Fund, see "INVESTMENT MANAGEMENT FEE," "ADMINISTRATION," "FUND EXPENSES," and "PURCHASING SHARES."

The following example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The example assumes that all distributions are reinvested at NAV and that the percentage amounts listed under annual expenses remain the same in the years shown. The assumption in the hypothetical example of a 5% annual return is the same as that required by regulation of the SEC applicable to all registered investment companies. The assumed 5% annual return is not a prediction of, and does not represent, the projected or actual performance of the Shares.

Example

You Would Pay the Following Expenses Based on a \$1,000 Investment in the Fund, Assuming a 5% Annual Return:

	1 Year	3 Years	5 Years	10 Years
	\$37	\$119	\$204	\$422

The example is based on the annual fees and expenses set out on the table above, taking into account the fee waiver in the first year of each period and should not be considered a representation of future expenses. Actual expenses may be greater or less than those shown. Moreover, the rate of return of the Fund may be greater or less than the hypothetical 5% return used in the example. A greater rate of return than that used in the example would increase the dollar amount of the asset-based fees paid by the Fund.

FINANCIAL HIGHLIGHTS

The information contained in the table below for the fiscal year ended March 31, 2023, sets forth selected information derived from the Fund's financial statements (the "Annual Report"). Financial statements contained in the Annual Report have been audited by Cohen & Company, Ltd. ("Cohen"), the Fund's independent registered public accounting firm. The audited financial statements for the fiscal year ended March 31, 2023, including Cohen's report, are incorporated by reference into this Prospectus. You may obtain the Annual Report free of charge by writing to the Fund, c/o UMB Fund Services, Inc., 235 West Galena Street, Milwaukee, WI 53212, by calling the Fund toll-free at (877) 997-9971 or by following the following hyperlink: https://www.sec.gov/Archives/edgar/data/1830921/000139834423011927/fp0083606-3_ncsr.htm. The information in the table below should be read in conjunction with each of those financial statements and the notes thereto.

	For the Year Ended March 31, 2023	For the Year Ended March 31, 2022 ¹

Expenses after expense waivers, income tax expense and Income tax reimbursement ^{3, 6}	0.61%	0.52%
Portfolio turnover rate	19%	15%

¹ Reflects operations from April 1, 2021 (commencement of operations) to March 31, 2022.

² Per share data is computed using the average shares method.

- ³ The ratios of expenses and net investment income or loss to average net assets do not reflect the Fund's proportionate share of income and expenses of underlying investment companies in which the Fund invests.
- ⁴ Without Income Tax Expense voluntary reimbursement by Investment Manager, the Total Return would be (7.86)%.
- ⁵ Includes income tax expense of 0.15% derived from income for the tax year ended October 31, 2022. Income tax expense is voluntarily reimbursed by the Investment Manager.
- ⁶ For the tax year ended October 31, 2022, income tax expense derived from income and capital gains is 0.71%. Income tax expense is voluntarily reimbursed by the Investment Manager.

USE OF PROCEEDS

The proceeds from the sale of Shares, not including the Fund's fees and expenses (including, without limitation, offering expenses not paid by the Investment Manager), will be invested by the Fund in accordance with the Fund's investment objective and strategies as soon as practicable, but in no event later than three months after receipt, consistent with market conditions and the availability of suitable investments. Such proceeds will be invested together with any interest earned in the Fund's escrow account prior to the closing of the applicable offering. See "*PURCHASING SHARES—Purchase Terms.*" Delays in investing the Fund's assets may occur, for example, because of the time required to complete certain transactions, but any such delay will not exceed three months after the receipt of funds.

Pending the investment of the proceeds of any offering or any other available funds pursuant to the Fund's investment objective and strategies, a portion of such amounts, which may include a substantial portion of the proceeds of an offering, may be invested in short-term debt securities or money market funds. In addition, subject to applicable law, the Fund may maintain a portion of its assets in cash or such short-term securities or money market funds to meet operational needs, for temporary defensive purposes, or to maintain liquidity. The Fund may be prevented from achieving its objective during any period in which the Fund's assets are not substantially invested in accordance with its principal investment strategies.

INVESTMENT OBJECTIVE AND STRATEGIES

INVESTMENT OBJECTIVE

The Fund's investment objective is to seek long-term capital appreciation. The Fund intends to invest substantially all of its assets primarily in general or limited partnerships, U.S. and foreign funds (including open-end funds, closed-end funds and exchange-traded funds), corporations, trusts or other investment vehicles (collectively, "Investment Funds") that invest substantially all their assets in real estate, infrastructure, commodities and other real asset securities and funds. Under normal circumstances, the Fund intends to invest at least 80% of its net assets in Investment Funds that hold equity, debt and other economic interests in real assets or real asset companies.

INVESTMENT STRATEGIES

The Fund seeks to achieve its investment objective by allocating its assets among a range of real asset investment strategies. The Fund's investments in real asset investment strategies include funds that invest in public and private issuances of equity securities, debt securities (including but not limited to bank loans, high yield or "junk" securities, secured debt, inflation-indexed securities and mezzanine financing) and commodities (including but not limited to precious metals and energy resources). The Fund may invest in U.S. and foreign, including emerging market, securities and Investment Funds. The Fund concentrates its investments (invests more than 25% of its net assets) in real asset and real asset related securities and strategies.

In selecting Investment Funds and asset class exposures, the Investment Manager will take asset diversification and potential volatility of return into account. In seeking to achieve the Fund's investment objective, preserve capital and fund capital calls from private funds, the Investment Manager may invest a portion of the Fund's net assets in cash, cash equivalents and selected fixed income strategies. The Fund may invest in a real asset strategy by employing a sub-advisor approved by the Board of Trustees. The Fund may invest in Investment Funds directly or through (i) its wholly-owned Cayman Islands subsidiary (the "Cayman Subsidiary") or (ii) its wholly-owned subsidiary organized under Delaware law as a corporation (the "Onshore Subsidiary," together with the Cayman Subsidiary, the "Subsidiaries"). The Fund may allocate up to 25% of its assets in the Subsidiaries, which have the same investment objective as the Fund, are intended to provide the Fund with indirect exposure to Investment Funds in a manner consistent with the limitations and requirements of the Internal Revenue Code of 1986, as amended (the "Code") that apply to the Fund, which limit the amount of income the Fund may receive from certain sources. To the extent they are applicable to the investment activities of the Subsidiaries, the Subsidiaries will be subject to the same investment restrictions and limitations, and follow the same compliance policies and procedures, as the Fund. The Fund complies with Section 8 and Section 18 of the Investment Company Act, governing investment policies and capital structure and leverage, respectively, on an aggregate basis with the Subsidiaries. Each of the Subsidiaries complies with Section 17 of the Investment Company Act relating to affiliated transactions and custody. The Investment Manager serves as investment adviser to the Cayman Subsidiary and Onshore Subsidiary pursuant to a separate investment advisory agreement with each subsidiary. Although the Subsidiaries are not registered under the Investment Company Act, the Investment Manager complies with provisions of the Investment Company Act relating to investment advisory contracts with respect to the Subsidiaries.

Private Funds. The Fund may gain exposure to real asset related investments through investments in continuously offered private real asset funds and, through investments in closed-end institutional real asset funds (collectively the "Private Funds"). The Private Funds invest in the equity (common and preferred) and debt financings associated with the acquisition, development, and/or operations of real assets and real asset companies. Additionally, the Private Funds may seek to make debt investments via primary and secondary markets in secured and unsecured real asset-related debt. The closed-end Private Funds include funds that have minimums to close and maximum capital raise limitations ("targeted capital raises"), multi-year periods with limited or no liquidity ("investment lock-up periods"), and targeted termination or liquidity dates ("expected fund life terms").

Real Estate. This strategy invests in real estate and related investments such as: exchange-traded and privately-traded real estate investment trusts ("REITs") and REIT-like entities; residential mortgage-backed securities ("RMBS"), commercial mortgage-backed securities ("CMBS") and other securitized products; investments related to existing or newly constructed income-producing properties (including but not limited to office, industrial, retail, and multi-family residential properties); raw land; mortgage loans; and real estate companies (companies that have substantial holdings in, or primarily own or manage, real estate; paper, lumber, hotel and entertainment companies; building supply manufacturers; and mortgage lenders and mortgage servicing companies). REITs are pooled investment vehicles that invest in real estate or real estate-related companies. If a REIT meets certain requirements, including distributing to shareholders substantially all its taxable income (other than net capital gains), then it is not taxed on the income distributed to shareholders. CMBS are bonds that are secured by first mortgages on commercial real estate.

Infrastructure. This strategy invests in infrastructure, including equity and debt interests in infrastructure assets and companies, including master limited partnerships ("MLP") as well as funds with a similar investment orientation. Infrastructure assets provide essential facilities and services supporting economic productivity. Such assets may include, among others, regulated assets (including but not limited to electricity transmission and distribution facilities, gas

distribution systems, water distribution and waste water collection and processing facilities), transportation assets (including but not limited to toll roads, airports, seaports and railway lines), and communications assets (including but not limited to data centers, broadcast and wireless towers, fiber/broadband and satellite networks).

PRINCIPAL RISK FACTORS

All investments carry risks to some degree. The Fund cannot guarantee that its investment objective will be achieved or that its strategy of investing in the Investment Funds will be successful. **An investment in the Fund involves substantial risks, including the risk that the entire amount invested may be lost.** The Fund allocates its assets to Underlying Managers and invests in Investment Funds that invest in and actively trade securities and other financial instruments using a variety of strategies and investment techniques that may involve significant risks. Various other types of risks are also associated with investments in the Fund, including risks relating to the fund of funds structure of the Fund, risks relating to compensation arrangements and risks relating to the limited liquidity of the Shares. Below is a list of principal risks of investing in the Fund. Different risks may be more significant at different times, depending on market conditions.

GENERAL RISKS

LIMITED OPERATING HISTORY. The Fund is a recently-organized closed-end management investment company that has limited operating history and no public trading of its shares. The Fund is designed primarily as a long-term investment vehicle and not as a trading tool. An investment in the Fund's Shares should not constitute a complete investment program for any investor and involves a high degree of risk. Due to the uncertainty in all investments, there can be no assurance that the Fund will achieve its investment objective. The value of the Fund's Shares could decline substantially and cause you to lose some or all of your investment.

LACK OF OPERATING HISTORY OF INVESTMENT FUNDS. Certain Investment Funds may be newly formed entities that have no operating histories. In such cases, the Investment Manager may evaluate the past investment performance of the applicable Underlying Managers or of their personnel. However, this past investment performance may not be indicative of the future results of an investment in an Investment Fund. Although the Investment Manager and its affiliates and their personnel have experience evaluating the performance of alternative asset managers and providing manager selection and asset allocation services to clients, the Fund's investment programs should be evaluated on the basis that there can be no assurance that the Investment Manager's assessments of Underlying Managers, and in turn their assessments of the short-term or long-term prospects of investments, will prove accurate. Thus, the Fund may not achieve its investment objective and its NAV may decrease.

INDUSTRY CONCENTRATION RISK. Certain Investment Funds are not subject to industry concentration restrictions on their investments and, in some cases, may invest 25% or more of the value of their total assets in a single industry or group of related industries. Although the Fund does not believe it is likely to occur given the nature of its investment program, it is possible that, at any given time, the assets of Investment Funds in which the Fund has invested will, in the aggregate, be invested in a single industry or group of related industries constituting 25% or more of the value of their combined total assets. However, because these circumstances may arise, the Fund is subject to greater investment risk to the extent that a significant portion of its assets may at times be invested, through investments the Fund makes in the Investment Funds, in the securities of issuers engaged in similar businesses that are likely to be affected by the same market conditions and other industry-specific risk factors. Such Investment Funds are not generally required to

provide current information regarding their investments to their investors (including the Fund). Thus, the Fund and the Investment Manager may not be able to determine at any given time whether or the extent to which Investment Funds, in the aggregate, have invested 25% or more of their combined assets in any particular industry.

REPURCHASE OFFERS. The Fund will offer to purchase only a small portion of its Shares (generally each quarter), and there is no guarantee that Shareholders will be able to sell all of the Shares that they desire to sell in any particular repurchase offer. If a repurchase offer is oversubscribed, the Fund may repurchase only a pro rata portion of the Shares tendered by each Shareholder. The potential for proration may cause some investors to tender more Shares for repurchase than they wish to have repurchased. The decision to offer to repurchase Shares is in the complete and absolute discretion of the Board and the Board may, under certain circumstances, elect not to offer to repurchase Shares.

The Fund's repurchase policy will have the effect of decreasing the size of the Fund over time from what it otherwise would have been. Such a decrease may therefore force the Fund to sell assets it would not otherwise sell. It may also reduce the investment opportunities available to it and cause its expense ratio to increase.

Payment for repurchased Shares may require the Fund to liquidate portfolio holdings earlier than the Investment Manager would otherwise want, potentially resulting in losses, and may increase the Fund's portfolio turnover, subject to such policies as may be established by the Board in an attempt to avoid or minimize potential losses and turnover resulting from the repurchase of Shares.

If a Shareholder tenders all of its Shares (or a portion of its Shares) in connection with a repurchase offer made by the Fund, that tender may not be rescinded by the Shareholder after the date on which the repurchase offer terminates. However, although the amount payable to the Shareholder will be based on the value of the Fund's assets as of the repurchase date, the value of Shares that are tendered by Shareholders generally will not be determined until a date approximately one month later. Thus, a Shareholder will not know its repurchase price until after it has irrevocably tendered its Shares.

LIMITED LIQUIDITY; IN-KIND DISTRIBUTIONS. Shares in the Fund provide limited liquidity since Shareholders will not be able to redeem Shares on a daily basis. A Shareholder may not be able to tender its Shares in the Fund promptly after it has made a decision to do so. In addition, with very limited exceptions, Shares are not transferable, and liquidity will be provided only through repurchase offers made from time to time by the Fund. Shares in the Fund are therefore suitable only for investors who can bear the risks associated with the limited liquidity of Shares and should be viewed as a long-term investment.

The Fund expects to distribute cash to the Shareholders for Shares that are repurchased. However, there can be no assurance that the Fund will have sufficient cash to pay for Shares that are being repurchased or that it will be able to liquidate investments at favorable prices to pay for repurchased Shares. Investment Funds may be permitted to redeem their interests in-kind. Thus, the Investment Funds may pay the Fund's redemption proceeds in securities that are illiquid or difficult to value. In these circumstances, the Fund would seek to dispose of these securities in a manner that is in the best interests of the Fund. The Fund does not intend to make in-kind distributions to the Shareholders.

In addition, in extreme cases, the Fund may not be able to complete repurchases if it is unable to redeem a portion of its investment in Investment Funds due to the Investment Funds' holding of illiquid investments.

BORROWING, USE OF LEVERAGE. The Fund may leverage its investments with the Underlying Managers by "borrowing." In addition, the strategies implemented by the Underlying Managers typically are leveraged. The use of leverage increases both risk and profit potential. The Investment Manager may cause the Fund to use various methods to

leverage investments, including (i) borrowing, (ii) swap agreements or other derivative instruments, (iii) employing certain Underlying Managers (many of which trade on margin and do not generally need additional capital in order to increase the level of the positions they acquire for it) to trade on the notional value of equity derivatives contracts (which is the value of the shares that are controlled rather than the cost of the transaction) or (iv) a combination of these methods. The Fund is subject to the Investment Company Act requirement that an investment company satisfy an asset coverage requirement of 300% of its indebtedness, including amounts borrowed, measured at the time the investment company incurs the indebtedness. This means that at any given time the value of the Fund's total indebtedness may not exceed one-third of the value of its total assets (including such indebtedness). These limits do not apply to the Investment Funds and, therefore, the Fund's portfolio may be exposed to the risk of highly leveraged investment programs of certain Investment Funds.

DERIVATIVE INSTRUMENTS. The Fund and some or all of the Investment Funds may use options, swaps, futures contracts, forward agreements and other derivatives contracts. Transactions in derivative instruments present risks arising from the use of leverage (which increases the magnitude of losses), volatility, the possibility of default by a counterparty and illiquidity. Use of derivative instruments for hedging or speculative purposes by the Fund or the Investment Funds could present significant risks, including the risk of losses in excess of the amounts invested.

LEGAL, TAX AND REGULATORY. Legal, tax and regulatory changes could occur that may materially adversely affect the Fund. For example, the regulatory and tax environment for derivative instruments in which Underlying Managers may participate is evolving, and changes in the regulation or taxation of derivative instruments may materially adversely affect the value of derivative instruments held by the Fund and the ability of the Fund to pursue its trading strategies. On October 28, 2020, the SEC adopted Rule 18f-4 under the Investment Company Act relating to a registered investment company's use of derivatives and related instruments. Rule 18f-4 prescribes specific value-at-risk leverage limits for certain derivatives users and requires certain derivatives users to adopt and implement a derivatives risk management program (including the appointment of a derivatives risk manager and the implementation of certain testing requirements), and prescribes reporting requirements in respect of derivatives. Subject to certain conditions, if a fund qualifies as a "limited derivatives user," as defined in Rule 18f-4, it is not subject to the full requirements of Rule 18f-4. In connection with the adoption of Rule 18f-4, the SEC rescinded certain of its prior guidance regarding asset segregation and coverage requirements in respect of derivatives transactions and related instruments. With respect to reverse repurchase agreements or other similar financing transactions in particular, Rule 18f-4 permits a fund to enter into such transactions if the fund either (i) complies with the asset coverage requirements of Section 18 of the Investment Company Act, and combines the aggregate amount of indebtedness associated with all tender option bonds or similar financing with the aggregate amount of any other senior securities representing indebtedness when calculating the relevant asset coverage ratio, or (ii) treats all tender option bonds or similar financing transactions as derivatives transactions for all purposes under Rule 18f-4. The Fund adopted procedures for investing in derivatives and other transactions in compliance with Rule 18f-4. The Fund intends to be a limited derivatives user under Rule 18f-4 of the Investment Company Act. As a limited derivatives user, the Fund's derivatives exposure, excluding certain currency and interest rate hedging transactions, may not exceed 10% of its net assets. This restriction is not fundamental and may be changed by the Fund without a shareholder vote. as a limited derivatives user. Rule 18f-4. Rule 18f-4 under the Investment Company Act may require the Fund to observe more stringent asset coverage and related requirements than were previously imposed by the Investment Company Act, which could adversely affect the value or performance of the Fund. Limits or restrictions applicable to the counterparties or issuers, as applicable, with which the Fund may engage in derivative transactions could also limit or prevent the Fund from using certain instruments. Underlying Managers, to the extent they are subject to the Investment Company Act, may also be impacted by the requirements of Rule 18f-4.

Similarly, the regulatory environment for leveraged investors and for hedge funds generally is evolving, and changes in the direct or indirect regulation of leveraged investors or hedge funds may materially adversely affect the ability of the Fund to pursue its investment objective or strategies. Increased regulatory oversight and other legislation or regulation relating to hedge fund managers, hedge funds and funds of hedge funds could result. Such legislation or regulation could pose additional risks and result in material adverse consequences to the Investment Funds or the Fund and/or limit potential investment strategies that would have otherwise been used by the Underlying Managers or the Fund in order to seek to obtain higher returns.

In addition, there is uncertainty with respect to legislation, regulation and government policy at the federal, state and local levels, notably as respects U.S. trade, tax, healthcare, immigration, foreign and government regulatory policy. To the extent the U.S. Congress or presidential administration implements additional changes to U.S. policy, those changes may impact, among other things, the U.S. and global economy, international trade and relations, unemployment, immigration, healthcare, tax rates, the U.S. regulatory environment and inflation, among other areas. Until any additional policy changes are finalized, it cannot be known whether the Fund, Underlying Managers or their investments or future investments may be positively or negatively affected, or the impact of continuing uncertainty. Each prospective investor should also be aware that developments in the tax laws of the United States or other jurisdictions where the Fund or its Investment Funds invest could have a material effect on the tax consequences to the shareholders. In the event of any such change in law, each Shareholder is urged to consult its own tax advisers.

NON-QUALIFICATION AS A RIC. For the Fund's taxable years ended October 31, 2022 and October 31, 2023, the Fund failed to qualify as a RIC under Subchapter M of the Code. As a result, all of its net taxable income for those tax years are subject to tax at regular corporate rates without any deduction for distributions. The Fund intends to transfer assets to corporate subsidiaries in order to qualify as a RIC for its taxable year beginning November 1, 2023, but there can be no guarantee that the Fund will qualify as a RIC for future taxable years, and the Fund may continue to be subject to corporate tax. If the Fund fails to qualify as a RIC for more than two years and subsequently qualifies for a future year, it may be liable for a built-in gains tax with respect to certain assets when the Fund ultimately disposes of them. To qualify as a RIC, the Fund must meet three numerical requirements each year regarding (i) the diversification of the assets it holds, (ii) the income it earns, and (iii) the amount of taxable income that it distributes to shareholders. The Fund may also invest, either directly or indirectly through the Subsidiaries, in Investment Funds. To the extent that the Fund invests in Investment Funds directly and not through the Subsidiaries, the Fund's ability to meet the RIC diversification and income requirements will depend upon the investments held by such Investment Funds and the nature of the income produced by such investments. If For taxable years in which the Fund does not qualify as a RIC in any taxable year, the Fund's taxable income will be and is subject to federal corporate income taxes, and all distributions from earnings and profits, including distributions of net capital gain (if any), will be taxable to shareholders as ordinary income. However, such distributions will be eligible (i) to be treated as qualified dividend income, which is subject to tax at reduced rates, in the case of shareholders taxed as individuals and (ii) for the dividends received deduction in the case of corporate shareholders. In addition, in order to re-qualify for taxation as a RIC, the Fund may be required to recognize unrealized gains, pay substantial taxes and interest, and make substantial distributions. These requirements and certain additional tax risks associated with investments in the Fund are discussed in "TAXES" in this Prospectus.

NON-DIVERSIFIED STATUS. The Fund is a "non-diversified" management investment company. Thus, there are no percentage limitations imposed by the Investment Company Act on the Fund's assets that may be invested, directly or indirectly, in the securities of any one issuer. Consequently, if one or more securities are allocated a relatively large percentage of the Fund's assets, losses suffered by such securities could result in a higher reduction in the Fund's capital than if such capital had been more proportionately allocated among a larger number of securities. The Fund may also be more susceptible to any single economic or regulatory occurrence than a diversified investment company.

CYBERSECURITY RISK. Cybersecurity refers to the combination of technologies, processes and procedures established to protect information technology systems and data from unauthorized access, attack or damage. The Fund, the Investment Funds and their affiliates and third-party service providers are subject to cybersecurity risks. Cybersecurity risks have significantly increased in recent years and the Fund could suffer such losses in the future. Computer systems, software and networks may be vulnerable to unauthorized access, computer viruses or other malicious code and other events that could have a security impact. If one or more of such events occur, this potentially could jeopardize confidential and other information, including nonpublic personal information and sensitive business data, processed and stored in, and transmitted through, computer systems and networks, or otherwise cause interruptions or malfunctions in the Fund's operations or the operations of the Investment Funds or their respective affiliates and third-party service providers. This could result in significant losses, reputational damage, litigation, regulatory fines or penalties, or otherwise adversely affect the Fund's business, financial condition or results of operations. Privacy and information security laws and regulation changes, and compliance with those changes, may result in cost increases due to system changes and the development of new administrative processes. In addition, the Fund may be required to expend significant additional resources to modify the Fund's protective measures and to investigate and remediate vulnerabilities or other exposures arising from operational and security risks.

CORPORATE SUBSIDIARY RISK. By investing through a Corporate Subsidiary, the Fund is indirectly exposed to risks associated with a Corporate Subsidiary's direct investments in private real assets. Because a Corporate Subsidiary is not registered under the 1940 Act, the Fund, as an investor in the Corporate Subsidiary, will not have the protections offered to investors in registered investment companies. Changes in the laws of the United States or other jurisdiction, such as Delaware, under which the Fund and a Corporate Subsidiary are organized, including the regulations under the Code, could result in the inability of the Fund and/or the Corporate Subsidiary to operate as described in this Prospectus and the SAI and could negatively affect the Fund and its shareholders. If the Fund qualifies as a RIC, dividends received by the Fund from a Corporate Subsidiary and distributed to its shareholders in the same tax year will not be subject to U.S. federal income taxes at the Fund level, however, the Corporate Subsidiary will generally be subject to federal and state income taxes on its income, including any income the Corporate Subsidiary may recognize on the sale of an interest in private equity or private oil and gas funds that it holds. As a result, the net return to the Fund on such investments that are held by the Corporate Subsidiary will be reduced to the extent that the subsidiary is subject to income taxes, and losses incurred by the Corporate Subsidiary will not be available to the Fund to offset income or gain from other investments. Additionally, in calculating its net asset value in accordance with generally accepted accounting principles, the Fund will account for the deferred tax liability and/or asset balances of the Corporate Subsidiary. Any Corporate Subsidiary used by the Fund will accrue a deferred income tax liability balance, at the current maximum statutory U.S. federal income tax rate (currently 21%) plus an estimated state and local income tax rate, for its future tax liability associated with the capital appreciation of its investments and the distributions received by it on equity securities considered to be return of capital. Upon a Corporate Subsidiary's sale of a portfolio security, such Corporate Subsidiary will be liable for previously deferred taxes at the then current rate. Any deferred tax liability balance of a Corporate Subsidiary will reduce the Fund's net asset value.

Shareholders should consult their own tax advisors regarding any applicable tax consequences that may result from holding Shares.

SPECIAL RISKS OF FUND OF FUNDS STRUCTURE

NO REGISTRATION. Certain Investment Funds will not be registered as investment companies under the Investment Company Act. Accordingly, the provisions of the Investment Company Act, which, among other things, require investment companies to have securities held in custody at all times in segregated accounts and regulate the relationship

between the investment company and its asset management, are not applicable to an investment in the Investment Funds. In addition, such Investment Funds generally are not obligated to disclose the contents of their portfolios. This lack of transparency may make it difficult for the Investment Manager to monitor whether holdings of the Investment Funds cause the Fund to be above specified levels of ownership in certain investment strategies. Although the Fund expects to receive information from each Underlying Manager regarding its investment performance on a regular basis, in most cases there is little or no means of independently verifying this information. An Underlying Manager may use proprietary investment strategies that are not fully disclosed to its investors and may involve risks under some market conditions that are not anticipated by the Fund. In addition, while many Underlying Managers will register with the SEC and state agencies as a result of developments in certain laws, rules and regulations, some Underlying Managers may still be exempt from registration. In such cases, these Underlying Managers will not be subject to various disclosure requirements and rules that would apply to registered investment advisers. Similarly, while many Underlying Managers will register as commodity pool operators under the Commodity Exchange Act, other Underlying Managers will be exempt from registration and will not be subject to various disclosure requirements and rules that would apply to registered commodity pool operators.

The SEC adopted revisions to the rules permitting funds to invest in other investment companies to streamline and enhance the regulatory framework applicable to fund of funds arrangements. While new Rule 12d1-4 under the Investment Company Act permits more types of fund of fund arrangements without reliance on an exemptive order or no-action letters, it imposes new conditions, including limits on control and voting of acquired funds' shares, evaluations and findings by investment advisers, fund investment agreements, and limits on most three-tier fund structures. Rule 12d1-4 was effective as of January 19, 2021.

MULTIPLE LEVELS OF FEES AND EXPENSES. Although in many cases investor access to the Investment Funds may be limited or unavailable, an investor who meets the conditions imposed by an Investment Fund may be able to invest directly with the Investment Fund. By investing in Investment Funds indirectly through the Fund, the investor bears asset-based fees and performance-based fees and allocations, if any. Moreover, investors in the Fund bear a proportionate share of the fees and expenses of the Fund (including organizational and offering expenses not paid by the Investment Manager, operating costs, sales charges, brokerage transaction expenses, and administrative fees) and, indirectly, similar expenses of the Investment Funds. Thus, an investor in the Fund may be subject to higher operating expenses than if he or she invested in an Investment Fund directly or in a closed-end fund which did not utilize a "fund of funds" structure.

Certain Investment Funds may be subject to a performance-based fee or allocation, irrespective of the performance of other Investment Funds and the Fund generally. Accordingly, an Underlying Manager to an Investment Fund with positive performance may receive performance-based compensation from the Investment Fund, and thus indirectly from the Fund and its Shareholders, even if the Fund's overall performance is negative. Generally, fees payable to Underlying Managers of the Investment Funds will range from 0.00% to 2.00% (annualized) of the average NAV of the Fund's investment. In addition, certain Underlying Managers charge an incentive allocation or fee generally ranging from 0.00% to 20.00% of an Investment Fund's net profits, although it is possible that such ranges may be exceeded for certain Underlying Managers. The performance-based compensation received by an Underlying Manager also may create an incentive for that Underlying Manager to make investments that are riskier or more speculative than those that it might have made in the absence of the performance-based allocation. Such compensation may be based on calculations of realized and unrealized gains made by the Underlying Manager without independent oversight.

UNDERLYING MANAGERS INVEST INDEPENDENTLY. The Underlying Managers generally invest wholly independently of one another and may at times hold economically offsetting positions. To the extent that the Investment Funds do, in fact, hold such positions, the Fund's portfolio, considered as a whole, may not achieve any gain or loss despite

incurring fees and expenses in connection with such positions. Furthermore, it is possible that from time to time, various Investment Funds selected by the Investment Manager may be competing with each other for the same positions in one or more markets. In any such situations, the Fund could indirectly incur certain transaction costs without accomplishing any net investment result.

LIQUIDITY CONSTRAINTS OF INVESTMENT FUNDS. Since the Fund may make additional investments in or affect withdrawals from an Investment Fund only at certain times pursuant to limitations set forth in the governing documents of the Investment Fund, the Fund from time to time may have to invest a greater portion of its assets temporarily in money market securities than it otherwise might wish to invest and may have to borrow money to repurchase Shares. The redemption or withdrawal provisions regarding the Investment Funds vary from fund to fund. Therefore, the Fund may not be able to withdraw its investment in an Investment Fund promptly after it has made a decision to do so. Some Investment Funds may impose early redemption fees while others may not. This may adversely affect the Fund's investment return or increase the Fund's expenses and limit the Fund's ability to make offers to repurchase Shares from Shareholders. Investment Funds may be permitted to redeem their interests in-kind. Thus, upon the Fund's withdrawal of all or a portion of its interest in an Investment Fund, it may receive securities that are illiquid or difficult to value. See "CALCULATION OF NET ASSET VALUE." In these circumstances, the Investment Manager does not intend to distribute securities to Shareholders and therefore would seek to dispose of these securities in a manner that is in the best interests of the Fund.

Limitations on the Fund's ability to withdraw its assets from Investment Funds may, as a result, limit the Fund's ability to repurchase Shares. For example, many Investment Funds may impose lock-up periods prior to allowing withdrawals, which can be two years or longer from the date of the Fund's investment. After expiration of the lock-up period, withdrawals may be permitted only on a limited basis, such as semi-annually or annually. Because the primary source of funds to repurchase Shares will be withdrawals from Investment Funds, the application of these lock-ups and other withdrawal limitations, such as gates or suspension provisions, will significantly limit the Fund's ability to tender its Shares for repurchase.

VALUATION OF INVESTMENT FUNDS. The valuation of the Fund's investments in Investment Funds is ordinarily determined based upon valuations calculated by the Administrator, in accordance with valuation procedures approved by the Board and based on information provided by the Investment Funds or their respective administrators. Although the Investment Manager reviews the valuation procedures used by all Underlying Managers, neither the Investment Manager nor the Administrator can confirm or review the accuracy of valuations provided by Investment Funds or their administrators. An Underlying Manager may face a conflict of interest in valuing such securities since their values will affect the Underlying Manager's compensation.

If an Underlying Manager's valuations are consistently delayed or inaccurate, the Investment Manager generally will consider whether the Investment Fund continues to be an appropriate investment for the Fund. The Fund may be unable to sell interests in such an Investment Fund quickly, and could therefore be obligated to continue to hold such interests for an extended period of time. In such a case, such interests would continue to be valued without the benefit of the Underlying Manager's valuations, and the Investment Manager may determine to discount the value of the interests or value them at zero, if deemed to be the fair value of such holding. Revisions to the Fund's gain and loss calculations will be an ongoing process, and no appreciation or depreciation figure can be considered final until the annual audits of Investment Funds are completed. Promoting transparency and receiving necessary information from Investment Funds may possibly be an impediment to monitoring the performance of Investment Funds on a regular basis.

HIGH PORTFOLIO TURNOVER. The Fund's activities involve investment in the Investment Funds, which may invest on the basis of short-term market considerations. The turnover rate within the Investment Funds may be significant, potentially involving negative tax implications and substantial brokerage commissions, and fees. The Fund will have no control over this turnover. It is anticipated that the Fund's income and gains, if any, will be primarily derived from ordinary income. In addition, the withdrawal of the Fund from an Investment Fund could involve expenses to the Fund under the terms of the Fund's investment.

INDEMNIFICATION OF INVESTMENT FUNDS. The Underlying Managers often have broad indemnification rights and limitations on liability. The Fund may also agree to indemnify certain of the Investment Funds and, subject to certain limitations imposed by the Investment Company Act and the Securities Act, their Underlying Managers from any liability, damage, cost, or expense arising out of, among other things, certain acts or omissions relating to the offer or sale of the shares of the Investment Funds.

INVESTMENTS IN NON-VOTING SECURITIES. In order to avoid becoming subject to certain Investment Company Act prohibitions with respect to affiliated transactions, the Fund intends to own less than 5% of the voting securities of each Investment Fund. This limitation on owning voting securities is intended to ensure that an Investment Fund is not deemed an "affiliated person" of the Fund for purposes of the Investment Company Act, which may, among other things, potentially impose limits on transactions with the Investment Funds, both by the Fund and other clients of the Investment Manager. To limit its voting interest in certain Investment Funds, the Fund may enter into contractual arrangements under which the Fund irrevocably waives its rights (if any) to vote its interests in an Investment Fund. Other accounts managed by the Investment Manager may also waive its voting rights in a particular Investment Fund (for example, to facilitate investment in small Investment Funds determined to be attractive by the Investment Manager). Subject to the oversight of the Board, the Investment Manager will decide whether to waive such voting rights and, in making these decisions, will consider the amounts (if any) invested by the Fund and its other clients in the particular Investment Fund. Rights may not be waived or contractually limited for an Investment Fund that does not provide an ongoing ability for follow-on investment, such as an Investment Fund having a single initial funding, closing or commitment, after which no new investment typically would occur. These voting waiver arrangements may increase the ability of the Fund and other clients of the Investment Manager to invest in certain Investment Funds. However, to the extent the Fund contractually forgoes the right to vote the securities of an Investment Fund, the Fund will not be able to vote on matters that require the approval of the interest holders of the Investment Fund, including matters adverse to the Fund's interests.

Although the Fund may hold non-voting interests, the Investment Company Act and the rules and regulations thereunder may nevertheless require the Fund to limit its position in any one Investment Fund in accordance with applicable regulatory requirements, as may be determined by the Fund in consultation with counsel. These restrictions could change from time to time as applicable laws, rules or interpretations thereof are modified. There are also other statutory tests of affiliation (such as on the basis of control), and, therefore, the prohibitions of the Investment Company Act with respect to affiliated transactions could apply in some situations where the Fund owns less than 5% of the voting securities of an Investment Fund. In these circumstances, transactions between the Fund and an Investment Fund may, among other things, potentially be subject to the prohibitions relating to affiliates of Section 17 of the Investment Company Act notwithstanding that the Fund has entered into a voting waiver arrangement.

LACK OF CONTROL OVER UNDERLYING MANAGERS. The Fund will invest in Investment Funds that it believes will generally, and in the aggregate, be managed in a manner consistent with the Fund's investment objective and strategy. The Investment Manager will not have any control over the Underlying Managers, thus there can be no assurances that an Underlying Manager will manage its Investment Funds in a manner consistent with the Fund's investment objective.

The Investment Manager may be constrained by the withdrawal limitations imposed by private Investment Funds, which may restrict the Fund's ability to terminate investments in private Investment Funds that are performing poorly or have otherwise had adverse changes. The Investment Manager will be dependent on information provided by the private Investment Funds, including quarterly unaudited financial statements, which if inaccurate, could adversely affect the Investment Manager's ability to manage the Fund's investment portfolio in accordance with its investment objectives and/or the Fund's ability to calculate its net asset value accurately. By investing in the Fund, a Shareholder will not be deemed to be an investor in any Investment Fund and will not have the ability to exercise any rights attributable to an investor in any such Investment Fund related to their investment.

SUBSIDIARIES. The Fund may make investments through the Cayman Subsidiary and/or the Onshore Subsidiary. By investing in the Subsidiaries, the Fund is indirectly exposed to the risks associated with the Subsidiaries' investments. The investments held by the Subsidiaries are generally similar to those that are permitted to be held by the Fund and are subject to the same risks that apply to similar investments if held directly by the Fund. These risks are described elsewhere in this Prospectus. There can be no assurance that the investment objectives of the Subsidiaries will be achieved.

The Subsidiaries are not registered under the Investment Company Act, and, unless otherwise noted in this Prospectus, are not subject to all the investor protections of the Investment Company Act. However, the Fund wholly owns and controls the Subsidiaries, making it unlikely that the Subsidiaries will take action contrary to the interests of the Fund and its shareholders. The Board has oversight responsibility for the investment activities of the Fund, including its investment in the Subsidiaries, and the Fund's role as sole shareholder of each of the Cayman Subsidiary and the Onshore Subsidiary. The Subsidiaries will be subject to the same investment restrictions and limitations, and follow the same compliance policies and procedures, as the Fund.

Changes in the laws of the United States and/or the Cayman Islands could result in the inability of the Fund and/or its Subsidiaries to operate as described in this Prospectus and in the SAI and could adversely affect the Fund. For example, the Cayman Islands does not currently impose any income, corporate or capital gains tax, estate duty, inheritance tax, gift tax or withholding tax on the Subsidiary. If Cayman Islands law changes such that the Cayman Subsidiary must pay Cayman Islands taxes, Fund shareholders would likely suffer decreased investment returns.

There is a risk that the IRS could assert that the income derived from the Fund's investment in the Cayman Subsidiary will not be considered qualifying income for purposes of the Fund remaining qualified as a RIC for U.S. federal income tax purposes. In 2019, the Treasury and the IRS issued regulations that provide that the income from a foreign subsidiary that is a controlled foreign corporation is qualifying income for purposes of a fund remaining qualified as a RIC for U.S. federal income tax purposes provided (1) that the income is actually distributed by the foreign subsidiary to the RIC each year and (2) even if not distributed, to extent the income is derived with respect to the fund's business of investing in stock, securities or currencies. The Cayman Subsidiary intends to distribute its income each year. If the Fund were to fail to qualify as a RIC and became subject to federal income tax, shareholders of the Fund would be subject to diminished returns.

INVESTMENT-RELATED RISKS

GENERAL INVESTMENT-RELATED RISKS

GENERAL ECONOMIC AND MARKET CONDITIONS. The success of the Fund's investment program may be affected by general economic and market conditions, such as interest rates, availability of credit, inflation rates, economic uncertainty, changes in laws, and national and international political circumstances, global pandemics. These factors may affect the level and volatility of securities prices and the liquidity of investments held by the Fund in the Investment Funds and, thus, the Fund's investments. Unexpected volatility or illiquidity could impair the Fund's profitability or result in losses.

RECENT MARKET CIRCUMSTANCES. The spread of an infectious respiratory illness caused by a novel strain of coronavirus (known as COVID-19) has caused volatility, severe market dislocations and liquidity constraints in many markets, including securities the Fund holds, and may adversely affect the Fund's investments and operations. The transmission of COVID-19 and efforts to contain its spread have resulted in, among other things, international and domestic travel restrictions and disruptions, closed international borders, enhanced health screenings at ports of entry and elsewhere, disruption of and delays in healthcare service preparation and delivery, quarantines, event and service cancellations or interruptions, disruptions to business operations (including staff reductions), supply chains and consumer activity, as well as general concern and uncertainty that has negatively affected the economic environment. These disruptions led, and for an unknown period of time will continue to lead, to instability in the marketplace, including stock and credit market losses and overall volatility. The impact of COVID-19, and other infectious illness outbreaks, epidemics or pandemics that may arise in the future, could adversely affect the economies of many nations or the entire global economy, the financial performance of individual issuers, borrowers and sectors and the health of the markets generally in potentially significant and unforeseen ways. In addition, the impact of infectious illnesses, such as COVID-19, in emerging market countries may be greater due to generally less established healthcare systems. This crisis or other public health crises may exacerbate other pre-existing political, social and economic risks in certain countries or globally.

The Fund, the Investment Adviser and the Sub-Advisers have in place business continuity plans reasonably designed to ensure that they maintain normal business operations, and that the Fund, its portfolio and assets are protected. However, there can be no assurance that the Fund, its advisers and service providers, or the Fund's portfolio companies, will be able to maintain normal business operations for an extended period of time or will not lose the services of key personnel on a temporary or long-term basis due to illness or other reasons. A pandemic or disease could also impair the information technology and other operational systems upon which the Fund's advisers rely and could otherwise disrupt the ability of the Fund's service providers to perform essential tasks.

To satisfy any repurchase requests during periods of extreme volatility, such as those associated with COVID-19, it is more likely the Fund will be required to dispose of portfolio investments at unfavorable prices compared to their intrinsic value. In addition, any repurchase completed while the Fund has unrealized losses may cause the investors whose shares were repurchased to crystallize their losses even if such unrealized losses do not ultimately convert into realized losses. You should review this prospectus and the SAI to understand the Fund's discretion to implement temporary defensive measures.

The foregoing could lead to a significant economic downturn or recession, increased market volatility, a greater number of market closures, higher default rates and adverse effects on the values and liquidity of securities or other assets. Such impacts, which may vary across asset classes, may adversely affect the performance of the Fund's investments, the Fund and your investment in the Fund. In certain cases, an exchange or market may close or issue trading halts on either specific securities or even the entire market, which may result in the Fund being, among other things, unable to buy or sell certain securities or financial instruments or to accurately price its investments.

Governmental authorities and regulators throughout the world, such as the U.S. Federal Reserve (the "Fed"), have in the past responded to major economic disruptions with changes to fiscal and monetary policy, including but not limited to, direct capital infusions, new monetary programs and dramatically lower interest rates, such as those policy changes are being implemented in response to the COVID-19 pandemic. Such policy changes may adversely affect the value, volatility and liquidity of dividend and interest paying securities. The effect of efforts undertaken by the Fed to address the economic impact of the COVID-19 pandemic, such as the reduction of the federal funds target rate, and other monetary and fiscal actions that may be taken by the U.S. federal government to stimulate the U.S. economy, are not yet fully known. Although vaccines for COVID-19 have become more widely available, the duration of the COVID-19

outbreak and its variants and its full impacts are also unknown and the pace of recovery may vary from market to market, resulting in a high degree of uncertainty for potentially extended periods of time, especially in certain sectors in which the Fund may make investments.

In addition, Russia's military interventions in Ukraine have led to, and may lead to additional sanctions being levied by the United States, European Union and other countries against Russia. Russia's military incursion and the resulting sanctions could adversely affect global energy and financial markets and thus could affect the value of the Fund's investments, even beyond any direct exposure the Fund may have to Russian issuers or the adjoining geographic regions. The extent and duration of the military action, sanctions and resulting market disruptions are impossible to predict, but could be substantial. Any such disruptions caused by Russian military action or resulting sanctions may magnify the impact of other risks described in this Prospectus.

Interest rates in the United States and many other countries have risen in recent periods and may continue to rise in the future. See "INTEREST RATE RISK" for more information. Additionally, as a result of increasing interest rates, reserves held by banks and other financial institutions in bonds and other debt securities could face a significant decline in value relative to deposits and liabilities which, coupled with general economic headwinds resulting from a changing interest rate environment, creates liquidity pressures at such institutions, as evidenced by the bank run on the Silicon Valley Bank (SVB) Financial Group ("SVB") causing it to be placed into receivership. As a result, certain sectors of the credit markets could experience significant declines in liquidity, and it is possible that the Fund will not be able to manage this risk effectively. It is yet to be determined how the bank run on SVB will fully impact the overall performance of the Fund or one or more of its portfolio investments and how similar events may affect the ability of the Fund to execute its investment strategy.

HIGHLY VOLATILE MARKETS. Price movements of forwards, futures and other derivative contracts in which an Investment Fund's assets (and therefore the Fund's assets) may be invested are influenced by, among other things, interest rates, changing supply and demand relationships, trade, fiscal, monetary and exchange control programs and policies of governments, and national and international political and economic events and policies. The prices of commodities contracts and all derivative instruments, including futures and options, can be highly volatile. In addition, governments from time to time intervene, directly and by regulation, in certain markets, particularly those in currencies, financial instruments, futures and options. Such intervention often is intended directly to influence prices and may, together with other factors, cause all of such markets to move rapidly in the same direction because of, among other things, interest rate fluctuations. Investment Funds are also subject to the risk of the failure of any exchanges on which their positions trade or of the clearinghouses for those exchanges.

RISKS OF SECURITIES ACTIVITIES OF THE UNDERLYING MANAGERS. The Underlying Managers will invest and trade in a variety of different securities, and utilize a variety of investment instruments and techniques. Each security and each instrument and technique involves the risk of loss of capital. While the Investment Manager will attempt to moderate these risks, there can be no assurance that the Fund's investment activities will be successful or that the Shareholders will not suffer losses. See "RISKS OF SECURITIES ACTIVITIES OF THE UNDERLYING MANAGERS" for further information.

COUNTERPARTY RISK. Many of the markets in which the Investment Funds effect their transactions are "over the counter" or "inter-dealer" markets. The participants in these markets are typically not subject to credit evaluation and regulatory oversight as are members of "exchange based" markets. To the extent an Investment Fund invests in swaps, derivative or synthetic instruments, or other over the counter transactions, on these markets, the Investment Fund (and therefore the Fund) is assuming a credit risk with regard to parties with whom it trades and may also bear the risk of settlement default. These risks may differ materially from those associated with transactions effected on an exchange, which generally are backed by clearing organization guarantees, daily marking to market and settlement, and

segregation and minimum capital requirements applicable to intermediaries. Transactions entered into directly between two counterparties generally do not benefit from such protections. This exposes an Investment Fund (and therefore the Fund) to the risk that a counterparty will not settle a transaction in accordance with its terms and conditions because of a dispute over the terms of the contract (whether or not bona fide) or because of a credit or liquidity problem, thus causing the Investment Fund (and therefore the Fund) to suffer a loss. Such counterparty risk is accentuated in the case of contracts with longer maturities where events may intervene to prevent settlement, or where an Investment Fund has concentrated its transactions with a single or small group of counterparties. Investment Funds are not restricted from dealing with any particular counterparty or from concentrating any or all of their transactions with one counterparty. However, the Investment Manager, with the intent to diversify, intend to attempt to monitor counterparty credit exposure of Investment Funds. The ability of Investment Funds to transact business with any one or number of counterparties, the lack of any independent evaluation of such counterparties' financial capabilities and the absence of a regulated market to facilitate settlement may increase the potential for losses by the Fund.

VALUATION RISK. Unlike publicly traded common stock, which trades on national exchanges, there is no central place or exchange for shares or interests in some of the Fund's investments, generally including private Investment Funds, to trade. Similarly, investments held by an Investment Fund may also not be traded on an exchange or central marketplace. Due to the lack of centralized information and trading, the valuation of such investments may carry more risk than that of common stock. Uncertainties in the conditions of the financial and other markets, incomplete or unreliable reference data, human error, lack of transparency and inconsistency of valuation models and processes may lead to inaccurate asset pricing. In addition, other market participants may value securities differently than the Fund or the Investment Funds in which the Fund invests. As a result, the Fund may be subject to the risk that when an instrument is sold in the market, the amount received by the Fund or an Investment Fund is less than the value of such instruments carried on such fund's books.

The Fund may value its direct investments and Investment Funds at fair value. In addition, the portfolio investments of the Investment Funds in which the Fund invests may be valued at fair value in accordance with the valuation policies and procedures applicable to such Investment Funds. In general, fair value represents a good faith approximation of the current value of an asset. Shareholders should recognize that fair value pricing involve various judgments and consideration of factors that may be subjective and inexact. As a result, there can be no assurance that fair value priced assets will not result in future adjustments to the prices of securities or other assets (including securities and assets held by the Investment Funds), or that fair value pricing will reflect a price that the Fund or an Investment Fund is able to obtain upon sale. It is also possible that the fair value determined for a security or other asset will be materially different from quoted or published prices, from the prices used by others for the same security or other asset and/or from the value that actually could be or is realized upon the sale of that security or other asset. For example, an Investment Fund's NAV could be adversely affected if the Investment Fund's determinations regarding the fair value of the Investment Fund's investments were materially higher than the values that the Investment Fund ultimately realizes upon the disposal of such investments. In addition, valuation for illiquid assets may require more research than for more liquid investments and elements of judgment may play a greater role in valuation in such cases than for investments with a more active secondary market because there is less reliable objective data available.

There may not exist readily available market quotations for certain investments of the Fund and/or the Investment Funds in which the Fund invests. The most relevant information may often be provided by the issuer of such investments, which information could be extremely limited and outdated, and it may be difficult or impossible to confirm or review the accuracy of such information. Further, the issuer of such investments may face a conflict of interest in providing information or valuations to the Fund or an Investment Fund.

The Fund's NAV is a critical component in several operational matters including computation of advisory and services fees and determination of the price at which the Shares will be offered and at which the Shares will be repurchased. Consequently, variance in the valuation of the Fund's investments or in the valuation of the NAV of the Investment Funds in which the Fund invests will impact, positively or negatively, the fees and expenses shareholders will pay, the price a shareholder will receive in connection with a repurchase offer and the number of shares an investor will receive upon investing in the Fund. The Fund may need to liquidate certain investments, including illiquid investments, in order to repurchase Shares in connection with a repurchase offer. A subsequent decrease in the valuation of the Fund's investments after a repurchase offer could potentially disadvantage remaining shareholders to the benefit of shareholders whose Shares were accepted for repurchase. Alternatively, a subsequent increase in the valuation of the Fund's investments could potentially disadvantage shareholders whose Shares were accepted for repurchase to the benefit of remaining shareholders. Similarly, a subsequent decrease in the valuation of the Fund's investments after a subscription could potentially disadvantage subscribing investors to the benefit of pre-existing shareholders, and a subsequent increase in the valuation of the Fund's investments after a subscription could potentially disadvantage pre-existing shareholders to the benefit of subscribing investors.

COMMITMENT STRATEGY RISK. Certain of the instruments in which the Fund invests are structured to draw-down capital from investors through capital calls for purposes of private investments. Investors in such vehicles may not contribute the full amount of their commitment to the investment at the time of their initial purchase. Instead, investors may be required to make incremental contributions pursuant to capital calls. The overall impact on performance due to holding a portion of the investment portfolio in cash could be a drag on the Fund's performance. If investors in these vehicles employ an "over-commitment" strategy, this could result in insufficient cash to meet such commitments, which could have negative impacts on the Fund such as a reduced ability to pursue its investment strategy; a need to borrow or sell assets at depressed prices, and penalties. The Fund will need to make commitments in advance of knowing the account's total assets under management at the time the total commitment is fully drawn down. If assets have increased or decreased at a greater level than would normally be expected, the Fund may be significantly under or over its targeted allocation.

FRAUD RISK. Of paramount concern in loan investments is the possibility of material misrepresentation or omission on the part of the borrower or loan seller. Such inaccuracy or incompleteness may adversely affect the valuation of the collateral underlying the loans or may adversely affect the ability of the Fund to perfect or effectuate a lien on the collateral securing the loan. The Fund will rely upon the accuracy and completeness of representations made by borrowers to the extent reasonable, but cannot guarantee such accuracy or completeness.

ALTERNATIVE INVESTMENTS RISK. Alternative investments provide limited liquidity and include, among other things, the risks inherent in investing in securities, futures, commodities and derivatives, using leverage and engaging in short sales. An investment in alternative investment products is speculative, involves substantial risks, and should not constitute a complete investment program.

ASSET ALLOCATION RISK. The Fund's investment performance depends, at least in part, on how its assets are allocated and reallocated among asset classes and strategies. Such allocation could result in the Fund holding asset classes or investments that perform poorly or underperform other asset classes, strategies or available investments.

INVESTMENT STRATEGY-SPECIFIC INVESTMENT-RELATED RISKS

REAL ESTATE RELATED RISK. The main risk of real estate related investments is that the value of the underlying real estate may go down. Many factors may affect real estate values. These factors include both the general and local economies, the amount of new construction in a particular area, the laws and regulations (including zoning and tax

laws) affecting real estate and the costs of owning, maintaining and improving real estate. The availability of mortgages and changes in interest rates may also affect real estate values. If the Fund's or the Investment Funds' real estate-related investments are concentrated in one geographic area or in one property type, the Fund or the Investment Funds will be particularly subject to the risks associated with that area or property type. The Fund or the Investment Funds may invest in a wide array of real estate exposures that involve equity or equity-like risk in the underlying properties. Real estate historically has experienced significant fluctuation and cycles in value, and specific market conditions may result in a permanent reduction in value. The value of the real estate will depend on many factors beyond the control of the general partner, including, without limitation: changes in general economic or local conditions; changes in supply of or demand for competing properties in an area (as a result, for instance, of over-building); changes in interest rates; the promulgation and enforcement of governmental regulations relating to land use and zoning restrictions, environmental protection and occupational safety; unavailability of mortgage funds which may render the construction, leasing, sale or refinancing of a property difficult; the financial condition of borrowers and of tenants, buyers and sellers of property; changes in real estate tax rates and other operating expenses; the imposition of rent controls; energy and supply shortages; various uninsured or uninsurable risks; and natural disasters.

REITS. The Fund will invest in real asset related Investment Funds through Private Funds and entities that are intended to qualify as REITs. Qualification as a REIT under the Code in any particular year is a complex analysis that depends on a number of factors. There can be no guarantee that any entity in or through which the Fund invests will qualify as a REIT. An entity that fails to qualify as a REIT would be subject to a corporate level tax, would not be entitled to a deduction for dividends paid to its shareholders and would not pass through to its shareholders the character of income earned by the entity. If the Fund were to invest in an entity that failed to qualify as a REIT, such failure could significantly reduce the Fund's yield on that investment and could adversely affect the Fund's NAV.

INFRASTRUCTURE. The Fund or the Investment Funds may invest its assets in securities issued by companies in the infrastructure industry. Infrastructure companies are subject to a variety of factors that may adversely affect their business or operations, including high interest costs in connection with capital construction programs, high leverage, costs associated with environmental and other regulations, the effects of economic slowdown including surplus capacity, government budgetary constraints and other factors. Additionally, infrastructure companies may be subject to regulation by various governmental authorities and also may be affected by governmental regulation of rates charged to customers, service interruptions and/or legal challenges due to environmental, operational or other issues and the imposition of special tariffs and changes in tax laws, regulatory policies and accounting standards. There is also the risk that publicly-funded infrastructure projects, especially in emerging markets, may be subject to the effects of public corruption resulting in delays and cost overruns. Other risks include environmental damage due to a company's operations or an accident, changes in market sentiment toward infrastructure and terrorist acts. Infrastructure securities may also be highly illiquid investments.

MASTER LIMITED PARTNERSHIPS (MLPs). The Fund may invest in units of master limited partnerships ("MLPs"). MLP common units represent an equity ownership interest in an MLP. Some energy infrastructure companies in which the Fund may invest are organized as LLCs which are treated in the same manner as MLPs for federal income tax purposes. The Fund may invest in LLC common units which represent an ownership interest in the LLC. Interests in MLP and LLC common units entitle the holder to a share of the company's success through distributions and/or capital appreciation. I-Shares represent an indirect ownership interest in MLP common units issued by an MLP affiliate, which is typically a publicly traded LLC. Securities of MLP affiliates also include publicly traded equity securities of LLCs that own, directly or indirectly, general partner interests of an MLP. Pursuant to tax regulations, the Fund may invest no more than 25%

of its total assets in the securities of MLPs and other entities treated as qualified publicly traded partnerships. Issuers of MLP I-Shares are corporations and not partnerships for tax purposes. As a result, MLP I-Shares are not subject to this limitation.

A change in current tax law, or a change in the business of a given MLP, could result in an MLP being treated as a corporation for U.S. federal income tax purposes, which would result in such MLP being required to pay U.S. federal income tax on its taxable income. Thus, if any of the MLPs owned by the Fund were treated as corporations for U.S. federal income tax purposes, the after-tax return to the Fund with respect to its investment in such MLPs would be materially reduced.

To the extent that the Fund invests in the equity securities of an MLP, the Fund will be a limited partner or member in such MLP. Accordingly, the Fund will be required to include in its taxable income the Fund's allocable share of the income, gains, losses, deductions and expenses recognized by each such MLP, regardless of whether the MLP distributes cash to the Fund. The Fund may have to sell investments to provide cash to make required distributions if its allocable share of an MLP's income and gains is not offset by the MLP's tax deductions, losses and credits and the MLP does not distribute sufficient cash. The portion, if any, of a distribution received by the Fund from an MLP that is offset by the MLP's tax deductions, losses or credits is essentially treated as a return of capital. The percentage of an MLP's income and gains that is offset by tax deductions, losses and credits will fluctuate over time for various reasons. A significant slowdown in acquisition activity or capital spending by MLPs in which the Fund invests could result in a reduction of depreciation deductions, which may result in increased current taxable income for the Fund.

Because of the Fund's investments in equity securities of MLPs, the Fund's earnings and profits may be calculated using accounting methods that are different from those used for calculating taxable income. Because of these differences, the Fund may make distributions out of its current or accumulated earnings and profits, which will be treated as taxable dividends, even in years in which the Fund's distributions exceed its taxable income. In addition, changes in tax laws or regulations, or future interpretations of such laws or regulations, could adversely affect the Fund or the MLP investments in which the Fund invests.

COMMODITIES. The Fund or the Investment Funds may purchase or sell derivatives, securities or other instruments that provide exposure to commodities. The Fund's or the Investment Funds' investments in commodities-related instruments may subject the Fund to greater volatility than investments in traditional securities. The value of commodity-related instruments may be affected by changes in overall market movements, commodity index volatility, changes in interest rates, or factors affecting a particular industry or commodity, such as drought, floods, weather, livestock disease, embargoes, tariffs and international economic, political and regulatory developments. An unexpected surplus of a commodity caused by one of the aforementioned factors, for example, may cause a significant decrease in the value of the commodity (and a decrease in the value of any investments directly correlated to the commodity). Conversely, an unexpected shortage of a commodity caused by one of the aforementioned factors may cause a significant increase in the value of the commodity (and a decrease in the value of any investments inversely correlated to that commodity). The commodity markets are subject to temporary distortions and other disruptions due to, among other factors, lack of liquidity, the participation of speculators, and government regulation and other actions. The Fund or the Investment Funds may focus its commodity-related investments in a particular sector of the commodities market (such as gold, oil, metal or agricultural products). As a result, to the extent the Fund or the Investment Funds focus their investments in a particular sector of the commodities market, the Fund may be more susceptible to risks associated with those sectors, including the risk of due to adverse economic, business or political developments affecting a particular sector.

DISTRESSED SECURITIES. Certain of the companies in whose securities the Fund or the Investment Funds may invest may be in transition, out of favor, financially leveraged or troubled, or potentially troubled, and may be or have recently been involved in major strategic actions, restructurings, bankruptcy, reorganization or liquidation. These characteristics of these companies can cause their securities to be particularly risky, although they also may offer the potential for high returns. These companies' securities may be considered speculative, and the ability of the companies to pay their debts on schedule could be affected by adverse interest rate movements, changes in the general economic factors affecting a particular industry or specific developments within the companies.

Such investments can result in significant or even total losses. In addition, the markets for distressed investment assets are frequently illiquid.

In liquidation (both in and out of bankruptcy) and other forms of corporate reorganization, there exists the risk that the reorganization either will be unsuccessful (due to, for example, failure to obtain requisite approvals), will be delayed (for example, until various liabilities, actual or contingent, have been satisfied) or will result in a distribution of cash or a new security the value of which will be less than the purchase price to the Fund or the Investment Funds of the security in respect to which such distribution was made. In certain transactions, the Fund or the Investment Funds may not be "hedged" against market fluctuations, or, in liquidation situations, may not accurately value the assets of the company being liquidated. This can result in losses, even if the proposed transaction is consummated.

HIGH YIELD SECURITIES RISK. High yield securities (commonly referred to as "junk bonds") are below investment grade debt securities or comparable unrated securities and are considered predominantly speculative. Lower rated and comparable unrated debt securities tend to offer higher yields than higher rated securities with the same maturities because the historical financial condition of the issuers of such securities may not have been as strong as that of other issuers. However, lower rated securities generally involve greater risks of loss of income and principal than higher rated securities. Changes in economic conditions are also more likely to lead to a weakened capacity to make principal payments and interest payments. The recent economic downturn has severely affected the ability of many highly leveraged issuers to service their debt obligations or to repay their obligations upon maturity. Factors having an adverse impact on the market value of lower quality securities will have an adverse effect on the Fund's NAV to the extent that it invests in such securities. In addition, the Fund or the Investment Funds may incur additional expenses to the extent it is required to seek recovery upon a default in payment of principal or interest on its portfolio holdings or to take other steps to protect its investment in an issuer.

MEZZANINE DEBT. Mezzanine securities generally are rated below investment grade and frequently are unrated and present many of the same risks as senior loans, second lien loans and non-investment grade bonds. However, unlike senior loans and second lien loans, mezzanine securities are not a senior or secondary secured obligation of the related borrower. They typically are the most subordinated debt obligation in an issuer's capital structure. Mezzanine securities also may often be unsecured. Mezzanine securities therefore are subject to additional risk that the cash flow of the related borrower and the property securing the loan may be insufficient to repay the scheduled obligation after giving effect to any senior obligations of the related borrower. Mezzanine securities are also expected to be a highly illiquid investment. Mezzanine securities will be subject to certain additional risks to the extent that such loans may not be protected by financial covenants or limitations upon additional indebtedness. Investment in mezzanine securities is a highly specialized investment practice that depends more heavily on independent credit analysis than investments in other types of debt obligations.

SHORT POSITIONS. Short positions may comprise a significant portion of the Fund's overall portfolio. In short selling, the Fund or the Investment Funds will sell securities they do not own by borrowing such securities from a third party, such as a broker-dealer. The Fund or the Investment Funds are required to pay to the lender amounts equal to any

dividend which accrues during the period of the loan. To borrow a security, the Fund or the Investment Funds also may be required to pay a premium, which would increase the cost of the security sold. Short positions may be held for both profit opportunities and for hedging purposes. The Investment Manager or the Underlying Managers may from time to time engage in short sales for the Fund or the Investment Funds in an approach known as “pairs trading,” where the Fund or the Investment Funds combine a long position in a particular security with a short position in a similar security in the same or related industry or sector. Pairs trading may be undertaken for speculative and/or hedging purposes and may be weighted toward either the long or short side of the position. The Investment Manager or Underlying Managers may from time to time also make short sales “against the box”, where the Fund or the Investment Funds retain a long position in the same security. Short sales that are not “against the box” involve a form of investment leverage, and the amount of the Fund’s or the Investment Funds’ loss on a short sale is potentially unlimited. At any particular time, the Fund’s or the Investment Funds’ portfolio overall may be “net long” (i.e., the value of long positions, at cost, will be greater than the net exposure on short positions) or “net short” (net exposure on short positions will be greater than the value of long positions).

ASSET-BACKED (INCLUDING MORTGAGE-BACKED) SECURITIES. The Fund or the Investment Funds may invest in asset-backed investments that are backed primarily by the cash flows of a discrete pool of fixed or revolving receivables or other financial assets that by their terms convert into cash within a finite time period. These could include assets such as unsecured consumer or other receivables, credit card receivables, trade receivables, equipment leases, and other assets that produce streams of payments. Asset backed exposures are generally not insured or guaranteed by the related sponsor or any other entity and therefore, if the assets or sources of funds available to the issuer are insufficient to pay those outstanding liability, the Fund or the Investment Funds will incur losses. In addition, asset-backed exposures entail prepayment risk that may vary depending on the type of asset, but is generally less than the prepayment risk associated with mortgage-backed securities. Asset-backed investments present certain risks that are not presented by mortgage-backed securities. Primarily, these securities may provide the Fund or the Investment Funds with a less effective security interest in the related collateral than do mortgage-backed securities. Therefore, there is the possibility that recoveries on the underlying collateral may not, in some cases, be available to support payments on these investments.

Real Estate Loans

- Senior Mortgage Loans: These mortgage loans are typically secured by first liens on properties, including office, multifamily, retail, industrial, senior living facilities, hospitality and mixed-use. In some cases, first lien mortgages may be divided into an A-Note and a B-Note. The A-Note is typically a privately negotiated loan that is secured by a first mortgage on a commercial property or group of related properties that is senior to a B-Note secured by the same first mortgage property or group.
- Subordinated Debt: These loans may include structurally subordinated first mortgage loans and junior participations in first mortgage loans or participations in these types of assets. As noted above, a B-Note is typically a privately negotiated loan that is secured by a first mortgage on a commercial property or group of related properties and is subordinated by an A-Note secured by the same first mortgage property or group. The subordination of a B-Note or junior participation typically is evidenced by participation or intercreditor agreements with other holders of interests in the note. B-Notes are subject to more credit risk with respect to the underlying mortgage collateral than the corresponding A-Note.

- **Preferred Equity:** Real estate preferred equity investments are subordinate to first mortgage loans and are not collateralized by the property underlying the investment. As a holder of preferred equity, the Fund seeks to enhance its position with covenants that limit the activities of the entity in which the Fund has an interest and protect its equity by obtaining an exclusive right to control the underlying property after an event of default, should such default occur on the Fund's investment.
- **Mezzanine Loans:** Like B-Notes, these loans are also subordinated, but are usually secured by a pledge of the borrower's equity ownership in the entity that owns the property or by a second lien mortgage on the property. In a liquidation, these loans are generally junior to any mortgage liens on the underlying property, but senior to any preferred equity or common equity interests in the entity that owns the property. Investor rights are usually governed by intercreditor agreements. See "Mezzanine Debt" above.

Asset-backed securities entail certain risks not presented by mortgage-backed securities, including the risk that in certain states it may be difficult to perfect the liens securing the collateral backing certain asset-backed securities. In addition, certain asset-backed securities are based on loans that are unsecured, which means that there is no collateral to seize if the underlying borrower defaults.

BONDS AND OTHER FIXED INCOME SECURITIES. The Fund or the Investment Funds may invest in bonds and other fixed income securities, both U.S. and non- U.S., and may take short positions in these securities. The Fund or the Investment Funds will invest in these securities when they offer opportunities for capital appreciation (or capital depreciation in the case of short positions) and may also invest in these securities for temporary defensive purposes and to maintain liquidity. Fixed income securities include, among other securities: bonds, notes and debentures issued by U.S. and non-U.S. corporations; U.S. government securities or debt securities issued or guaranteed by a non-U.S. government; municipal securities; and mortgage-backed and asset backed securities. These securities may pay fixed, variable or floating rates of interest, and may include zero coupon obligations. Fixed income securities are subject to the risk of the issuer's inability to meet principal and interest payments on its obligations (i.e., credit risk) and are subject to price volatility resulting from, among other things, interest rate sensitivity, market perception of the creditworthiness of the issuer and general market liquidity (i.e., market risk).

EQUITY SECURITIES. The Fund's or the Investment Funds' portfolio may include long and short positions in common stocks, preferred stocks and convertible securities of U.S. and non-U.S. issuers. The Investment Manager or the Underlying Managers also may invest in depositary receipts relating to non-U.S. securities, which are subject to the risks affecting investments in foreign issuers discussed under "NON-U.S. INVESTMENTS" below. Issuers of unsponsored depositary receipts are not obligated to disclose material information in the United States, and therefore, there may be less information available regarding such issuers. Equity securities fluctuate in value, often based on factors unrelated to the value of the issuer of the securities, and such fluctuations can be pronounced.

FOREIGN CURRENCY TRANSACTIONS. The Fund or the Investment Funds may engage in foreign currency transactions for a variety of purposes, including "locking in" the U.S. dollar price of a security between trade and settlement date, or hedging the U.S. dollar value of securities held in the Fund or the Investment Funds. The Fund or the Investment Funds may also engage in foreign currency transactions for non-hedging purposes to generate returns.

Foreign currency transactions may involve, for example, the purchase of foreign currencies for U.S. dollars or the maintenance of short positions in foreign currencies. Foreign currency transactions may involve the Fund or the Investment Funds agreeing to exchange an amount of a currency they do not currently own for another currency at a future date. The Fund or the Investment Funds would typically engage in such a transaction in anticipation of a decline in the value

of the currency it sells relative to the currency that the Fund or the Investment Funds have contracted to receive in the exchange. The Investment Manager's or the Underlying Managers' success in these transactions will depend principally on its ability to predict accurately the future exchange rates between foreign currencies and the U.S. dollar.

The Fund or the Investment Funds may enter into forward contracts for hedging and non-hedging purposes in pursuing its investment objective. Forward contracts are transactions involving an obligation to purchase or sell a specific currency at a future date at a specified price. Forward contracts may be used for hedging purposes to protect against uncertainty in the level of future non-U.S. currency exchange rates, such as when the Investment Manager or the Underlying Managers anticipate purchasing or selling a non-U.S. security. This technique would allow the Investment Manager or the Underlying Managers to "lock in" the U.S. dollar price of the security. Forward contracts may also be used to attempt to protect the value of an existing holding of non-U.S. securities. Imperfect correlation may exist, however, between the non-U.S. securities holdings of the Fund or the Investment Funds, and the forward contracts entered into with respect to those holdings. In addition, forward contracts may be used for non-hedging purposes, such as when the Investment Manager or the Underlying Managers anticipate that particular non-U.S. currencies will appreciate or depreciate in value, even though securities denominated in those currencies are not then held in the applicable investment portfolio. Generally, the Fund or the Investment Funds are subject to no requirement that they hedge all or any portion of their exposure to non-U.S. currency risks, and there can be no assurance that hedging techniques will be successful if used.

INFLATION-INDEXED SECURITIES. The Fund or the Investment Funds may invest in inflation-indexed securities that are debt securities, the principal value of which is periodically adjusted to reflect the rate of inflation as indicated by the Consumer Price Index (CPI). Inflation-indexed securities may be issued by the U.S. government, by agencies and instrumentalities of the U.S. government, and by corporations. Two structures are common. The U.S. Treasury and some other issuers use a structure that accrues inflation into the principal value of the bond. Most other issuers pay out the CPI accruals as part of a semiannual coupon payment.

The periodic adjustment of U.S. inflation-indexed securities is tied to the CPI, which is calculated monthly by the U.S. Bureau of Labor Statistics. The CPI is a measurement of changes in the cost of living, made up of components such as housing, food, transportation, and energy. Inflation-indexed securities issued by a foreign government are generally adjusted to reflect a comparable inflation index, calculated by that government. There can be no assurance that the CPI or any foreign inflation index will accurately measure the real rate of inflation in the prices of goods and services. Moreover, there can be no assurance that the rate of inflation in a foreign country will correlate to the rate of inflation in the United States.

Inflation—a general rise in prices of goods and services—erodes the purchasing power of an investor's portfolio. For example, if an investment provides a "nominal" total return of 5% in a given year and inflation is 2% during that period, the inflation-adjusted, or real, return is 3%. Inflation, as measured by the CPI, has generally occurred during the past 50 years, so investors should be conscious of both the nominal and real returns of their investments. Investors in inflation-indexed securities funds who do not reinvest the portion of the income distribution that is attributable to inflation adjustments will not maintain the purchasing power of the investment over the long term. This is because interest earned depends on the amount of principal invested, and that principal will not grow with inflation if the investor fails to reinvest the principal adjustment paid out as part of the Fund's income distributions. Although inflation-indexed securities are expected to be protected from long-term inflationary trends, short-term increases in inflation may lead to a decline in value. If interest rates rise because of reasons other than inflation (e.g., changes in currency exchange rates), investors in these securities may not be protected to the extent that the increase is not reflected in the bond's inflation measure.

If the periodic adjustment rate measuring inflation (i.e., the CPI) falls, the principal value of inflation-indexed securities will be adjusted downward, and consequently the interest payable on these securities (calculated with respect to a smaller principal amount) will be reduced. Repayment of the original bond principal upon maturity (as adjusted for inflation) is guaranteed in the case of U.S. Treasury inflation-indexed securities, even during a period of deflation. However, the current market value of the inflation-indexed securities is not guaranteed and will fluctuate. Other inflation-indexed securities include inflation-related bonds, which may or may not provide a similar guarantee. If a guarantee of principal is not provided, the adjusted principal value of the bond repaid at maturity may be less than the original principal.

The value of inflation-indexed securities should change in response to changes in real interest rates. Real interest rates, in turn, are tied to the relationship between nominal interest rates and the rate of inflation. Therefore, if inflation were to rise at a faster rate than nominal interest rates, real interest rates might decline, leading to an increase in value of inflation-indexed securities. In contrast, if nominal interest rates were to increase at a faster rate than inflation, real interest rates might rise, leading to a decrease in value of inflation-indexed securities.

Coupon payments that the Fund or the Investment Funds receive from inflation-indexed securities are included in the fund's gross income for the period during which they accrue. Any increase in principal for an inflation-indexed security resulting from inflation adjustments is considered by IRS regulations to be taxable income in the year it occurs. For direct holders of an inflation-indexed security, this means that taxes must be paid on principal adjustments, even though these amounts are not received until the bond matures. By contrast, if the Fund or the Investment Funds hold these securities, they distribute both interest income and the income attributable to principal adjustments each quarter in the form of cash or reinvested shares (which, like principal adjustments, are taxable to shareholders). It may be necessary for the Fund or the Investment Funds to liquidate portfolio positions, including when it is not advantageous to do so, in order to make required distributions.

INTEREST RATE RISK. The Fund or the Investment Funds are subject to the risks of changes in interest rates. A decline in interest rates could reduce the amount of current income the Fund or the Investment Funds are able to achieve from interest on fixed-income securities, convertible debt and the proceeds of short sales. An increase in interest rates could reduce the value of any fixed income securities and convertible securities owned by the Fund or the Investment Funds. To the extent that the cash flow from a fixed income security is known in advance, the present value (i.e., discounted value) of that cash flow decreases as interest rates increase; to the extent that the cash flow is contingent, the dollar value of the payment may be linked to then prevailing interest rates. Moreover, the value of many fixed income securities depends on the shape of the yield curve, not just on a single interest rate. Thus, for example, a callable cash flow, the coupons of which depend on a short rate such as the three-month London Interbank Offered Rate ("LIBOR"), may shorten (i.e., be called away) if the long rate decreases. In this way, such securities are exposed to the difference between long rates and short rates. The Fund or the Investment Funds may also invest in floating rate securities. The value of these investments is closely tied to the absolute levels of such rates, or the market's perception of anticipated changes in those rates. This introduces additional risk factors related to the movements in specific interest rates that may be difficult or impossible to hedge, and that also interact in a complex fashion with prepayment risks.

A wide variety of factors can cause interest rates or yields of U.S. Treasury securities or other types of bonds to rise (e.g., central bank monetary policies, inflation rates, general economic conditions, reduced market demand for low yielding investments, etc.). The Fed has been raising interest rates in light of recent inflationary pressures and interest rates may continue to increase rapidly, thus exposing the Fund's investments, and therefore the Fund, to the aforementioned risks.

Interest rates in the United States and many other countries have risen in recent periods and may continue to rise in the future. Because longer-term inflationary pressure may result from the U.S. government's fiscal policies, the Fund may experience rising interest rates, rather than falling rates, over its investment horizon. To the extent the Fund or an Investment Fund borrows money to finance its investments, the Fund's or an Investment Fund's performance will depend, in part, upon the difference between the rate at which it borrows funds and the rate at which it invests those funds. In periods of rising interest rates, the Fund's cost of funds could increase. Adverse developments resulting from changes in interest rates could have a material adverse effect on the Fund's or an Investment Fund's financial condition and results of operations.

In addition, a decline in the prices of the debt the Fund or an Investment Fund owns could adversely affect the Fund's net asset value. Changes in market interest rates could also affect the ability of operating companies in which the Fund or an Investment Fund invests to service debt, which could materially impact the Fund or an Investment Fund in which the Fund may invest, thus impacting the Fund.

LIBOR RISK. The Fund's and Investment Funds' investments, interest payment obligations and financing terms may be based on floating rates, such as LIBOR. LIBOR is used extensively in the U.S. and globally as a "benchmark" or "reference rate" for various commercial and financial contracts, including corporate and municipal bonds, bank loans, asset-backed and mortgage-related securities, interest rate swaps and other derivatives. In July of 2017, the head of the UK Financial Conduct Authority ("FCA") announced a desire to phase out the use of LIBOR by the end of 2021. The FCA and ICE Benchmark Administrator have since announced that most LIBOR settings will no longer be published after December 31, 2021 and a majority of U.S. dollar LIBOR settings will cease publication after June 30, 2023. Further, on March 15, 2022, the Consolidated Appropriations Act of 2022, which includes the Adjustable Interest Rate (LIBOR) Act, was signed into law in the United States. This legislation establishes a uniform benchmark replacement process for financial contracts that mature after June 30, 2023 that do not contain clearly defined or practicable fallback provisions.

It is possible that a subset of LIBOR settings will be published after these dates on a "synthetic" basis, but any such publications would be considered non-representative of the underlying market. The U.S. Federal Reserve, based on the recommendations of the New York Federal Reserve's Alternative Reference Rate Committee (comprised of major derivative market participants and their regulators), has begun publishing Secured Overnight Financial Rate Data ("SOFR") that is intended to replace U.S. dollar LIBOR. Proposals for alternative reference rates for other currencies have also been announced or have already begun publication. Markets are slowly developing in response to these new reference rates. Uncertainty related to the liquidity impact of the change in rates, and how to appropriately adjust these rates at the time of transition, poses risks for the Investment Funds and Fund. The effect of any changes to, or discontinuation of, LIBOR on the Investment Funds and Fund will depend on, among other things, (1) existing fallback or termination provisions in individual contracts, and (2) whether, how, and when industry participants develop and adopt new reference rates and fallbacks for both legacy and new instruments and contracts.

The expected discontinuation of LIBOR could have a significant impact on the financial markets in general and may also present heightened risk to market participants, including public companies, investment advisers, investment companies, and broker-dealers. The risks associated with this discontinuation and transition will be exacerbated if the work necessary to effect an orderly transition to an alternative reference rate is not completed in a timely manner. For example, current information technology systems may be unable to accommodate new instruments and rates with features that differ from LIBOR. Accordingly, it is difficult to predict the full impact of the transition away from LIBOR on the Fund until new reference rates and fallbacks for both legacy and new instruments and contracts are commercially accepted and market practices become settled.

The transition process could lead to (i) an increased volatility and illiquidity in markets for instruments whose terms currently include LIBOR, (ii) a reduction in the value of some LIBOR-based investments, or (iii) reduced effectiveness of related Fund transactions, such as hedging. Since the usefulness of LIBOR as a benchmark could deteriorate during the transition period, these effects could occur prior to the completion of the transition. All of the aforementioned may adversely affect the Fund's performance or NAV.

SOFR RISK. SOFR is intended to be a broad measure of the cost of borrowing funds overnight in transactions that are collateralized by U.S. Treasury securities. SOFR is calculated based on transaction-level repo data collected from various sources. For each trading day, SOFR is calculated as a volume-weighted median rate derived from such data. SOFR is calculated and published by the Federal Reserve Bank of New York ("FRBNY"). If data from a given source required by the FRBNY to calculate SOFR is unavailable for any day, then the most recently available data for that segment will be used, with certain adjustments. If errors are discovered in the transaction data or the calculations underlying SOFR after its initial publication on a given day, SOFR may be republished at a later time that day. Rate revisions will be effected only on the day of initial publication and will be republished only if the change in the rate exceeds one basis point.

Because SOFR is a financing rate based on overnight secured funding transactions, it differs fundamentally from LIBOR. LIBOR is intended to be an unsecured rate that represents interbank funding costs for different short-term maturities or tenors. It is a forward-looking rate reflecting expectations regarding interest rates for the applicable tenor. Thus, LIBOR is intended to be sensitive, in certain respects, to bank credit risk and to term interest rate risk. In contrast, SOFR is a secured overnight rate reflecting the credit of U.S. Treasury securities as collateral. Thus, it is largely insensitive to credit-risk considerations and to short-term interest rate risks. SOFR is a transaction-based rate, and it has been more volatile than other benchmark or market rates, such as three-month LIBOR, during certain periods. For these reasons, among others, there is no assurance that SOFR, or rates derived from SOFR, will perform in the same or similar way as LIBOR would have performed at any time, and there is no assurance that SOFR-based rates will be a suitable substitute for LIBOR. SOFR has a limited history, having been first published in April 2018. The future performance of SOFR, and SOFR-based reference rates, cannot be predicted based on SOFR's history or otherwise. Levels of SOFR in the future, including following the discontinuation of LIBOR, may bear little or no relation to historical levels of SOFR, LIBOR or other rates.

NON-U.S. INVESTMENTS. The Fund or the Investment Funds may invest in securities of non-U.S. companies and countries and non-U.S. Investment Funds. Foreign obligations have risks not typically involved in domestic investments. Foreign investing can result in higher transaction and operating costs for the Fund or the Investment Funds. Foreign issuers are not subject to the same accounting and disclosure requirements to which U.S. issuers are subject and consequently, less information may be available to investors in companies located in such countries than is available to investors in companies located in the United States. The value of foreign investments may be affected by reduced levels of governmental exchange control regulations; foreign withholding taxes; reduced liquidity in foreign markets; fluctuations in the rate of exchange between currencies and costs associated with currency conversions; the potential difficulty in repatriating funds; expropriation or nationalization of a company's assets; delays in settlement of transactions; other jurisdictions imposing restrictions on investments; changes in governmental economic or monetary policies in the United States or abroad; or other political and economic factors. In addition, there may be difficulty in obtaining or enforcing a court judgment abroad.

Securities of issuers in emerging and developing markets present risks not found in securities of issuers in more developed markets. Securities of issuers in emerging and developing markets may be more difficult to sell at acceptable prices and their prices may be more volatile than securities of issuers in more developed markets. Settlements of securities trades in emerging and developing markets may be subject to greater delays than in other markets so that the Fund or the Investment Funds might not receive the proceeds of a sale of a security on a timely basis. Emerging markets

generally have less developed trading markets and exchanges, and legal and accounting systems. In addition, emerging markets countries may have more or less government regulation and generally do not impose as extensive and frequent accounting, auditing, financial and other reporting requirements as the securities markets of more developed countries. The accounting, auditing and financial reporting standards and practices applicable to emerging market companies may be less rigorous, and there may be significant differences between financial statements prepared in accordance with those accounting standards as compared to financial statements prepared in accordance with international accounting standards. Consequently, the quality of certain foreign audits may be unreliable, which may require enhanced procedures, and the Fund may not be provided with the same level of protection or information as would generally apply in developed countries, potentially exposing the Fund to significant losses. As a result, there could be less information available about issuers in emerging market countries, which could negatively affect the Investment Manager's ability to evaluate local companies or their potential impact on the Fund's performance. Further, investments in securities of issuers located in certain emerging countries involve the risk of loss resulting from problems in share registration, settlement or custody, substantial economic, political and social disruptions and the imposition of exchange controls (including repatriation restrictions). The legal remedies for investors in emerging markets may be more limited than the remedies available in the U.S., and the ability of U.S. authorities (e.g., SEC and the U.S. Department of Justice) to bring actions against bad actors may be limited.

The Fund and Investment Funds may invest directly or indirectly from time to time in European companies and assets, including investments located in the United Kingdom ("UK"). In June 2016, the UK approved a referendum to leave the European Union ("EU"). The withdrawal, known colloquially as "Brexit", was agreed to and ratified by the UK Parliament, and the UK left the EU on January 31, 2020. The UK began a transition period in which to negotiate a new trading relationship for goods and services that ended on December 31, 2020. On January 1, 2021, the UK left the EU Single Market and Customs Union, as well as all EU policies and international agreements. On December 24, 2020, the UK and EU agreed to a trade deal with no tariffs or quotas on products, regulatory and customs cooperation mechanisms as well as provisions ensuring a level playing field for open and fair competition. In March 2021, the UK and EU put in place a regulatory dialogue on financial systems based on a separate memorandum of understanding. Since the referendum, there have been periods of significant volatility in the global stock markets and currency exchange rates, as well as challenging market conditions in the UK. At this time, the impact that the trade deal and any future agreements on services, particularly financial services, will have on the Fund and Investment Funds cannot be predicted, and it is possible that the new terms may adversely affect the Fund.

Further insecurity in EU membership or the abandonment of the euro could exacerbate market and currency volatility and negatively impact investments in securities issued by companies located in EU countries. Brexit also may cause additional member states to contemplate departing the EU, which would likely perpetuate political and economic instability in the region and cause additional market disruption in global financial markets. As a result, markets in the UK, Europe and globally could experience increased volatility and illiquidity, and potentially lower economic growth which in return could potentially have an adverse effect on the value of the Fund's investments.

SMALL CAPITALIZATION ISSUERS. The Fund or the Investment Funds may invest in smaller capitalization companies, including micro-cap companies. Investments in smaller capitalization companies often involve significantly greater risks than the securities of larger, better-known companies because they may lack the management expertise, financial resources, product diversification and competitive strengths of larger companies. The prices of the securities of smaller companies may be subject to more abrupt or erratic market movements than larger, more established companies, as these securities typically are traded in lower volume and the issuers typically are more subject to changes in earnings and prospects. In addition, when selling large positions in small capitalization securities, the seller may have to sell holdings at discounts from quoted prices or may have to make a series of small sales over a period of time.

* * *

LIMITS OF RISK DISCLOSURES. The above discussions of the various risks that are associated with the Fund and its Shares and the related discussion of risks in the SAI include the material risks involved with an investment in the Fund of which the Fund is currently aware. In addition, as the Fund's investment program changes or develops over time, an investment in the Fund may be subject to risk factors not currently contemplated or described in this Prospectus.

In view of the risks noted above, the Fund should be considered a speculative investment and prospective investors should invest in the Fund only if they can sustain a complete loss of their investment.

No guarantee or representation is made that the investment program of the Fund will be successful or that the Fund will achieve its investment objective.

MANAGEMENT OF THE FUND

THE BOARD OF TRUSTEES. The Board has overall responsibility for the management and supervision of the business operations of the Fund on behalf of the Shareholders. A majority of the Board is and will be persons who are not "interested persons," as defined in Section 2(a)(19) of the Investment Company Act (the "Independent Trustees"). To the extent permitted by the Investment Company Act and other applicable law, the Board may delegate any of its rights, powers and authority to, among others, the officers of the applicable fund, any committee of such board, or service providers. See "BOARD OF TRUSTEES AND OFFICERS" in the Fund's SAI for the identities of the Trustees and executive officers of the Fund, brief biographical information regarding each of them, and other information regarding the election and membership of the Board.

THE INVESTMENT MANAGER. Aspiriant, LLC serves as the investment adviser (the "Investment Manager") of the Fund. The Investment Manager is located at 11100 Santa Monica Blvd., Suite 600, Los Angeles, California and is an investment adviser registered with the SEC under the Investment Advisers Act of 1940, as amended. As of May 31, 2023, the Investment Manager and its affiliates had assets under management of approximately \$13 billion. In addition, the Investment Manager also serves as the investment adviser to each of the Cayman Subsidiary and the Onshore Subsidiary, pursuant to a separate investment advisory agreement with each such entity. The Adviser does not receive additional compensation for its management of the Cayman Subsidiary or the Onshore Subsidiary.

The Investment Manager and its affiliates may in the future serve as an investment manager or otherwise manage or direct the investment activities of other registered and/or private investment companies with investment programs similar to the investment program of the Fund. See "*CONFLICTS OF INTEREST.*"

PORTFOLIO MANAGERS.

John Allen, CFA, is Chief Investment Officer ("CIO") at the Investment Manager. Mr. Allen joined the Investment Manager as CIO in 2014. Prior to joining the Investment Manager he was a senior member of the client service team at Grantham, Mayo, Van Otterloo ("GMO") from 2009 to 2014. Prior to joining GMO, Mr. Allen was Head of Investments at a large family office. He began working in the financial services industry in the investment banking department at Donaldson, Lufkin & Jenrette and business consulting practice of Stern Stewart & Company. Mr. Allen is a graduate of the University of Virginia. Mr. Allen has served as a portfolio manager of the Fund since its commencement of operations on April 1, 2021.

Marc Castellani, CFA, CAIA, CIMA, is Managing Director of Investment Strategy & Research at the Investment Manager. Mr. Castellani joined the Investment Manager in 2015. Prior to joining the Adviser, he worked at J.P. Morgan Private Bank in Los Angeles from 2012 to 2015. Prior to joining J.P. Morgan Private Bank, he worked at U.S. Trust from 2010 to 2012. Previously, Mr. Castellani was a senior investment banker in the Merger and Acquisitions departments of J.P. Morgan and Banc of America Securities. He began his career in the financial services industry as an Associate in the corporate finance advisory practice of Stern Stewart & Company. Mr. Castellani is a graduate of Cornell University and holds a M.B.A from the University of Rochester. Mr. Castellani has served as a portfolio manager of the Fund since its commencement of operations on April 1, 2021.

THE INVESTMENT MANAGEMENT AGREEMENT. The Investment Management Agreement between the Investment Manager and the Fund became effective as of March 31, 2021, and continued in effect for an initial two-year term. Thereafter, the Investment Management Agreement is continuing in effect from year to year provided such continuance is specifically approved at least annually by (i) the vote of a majority of the outstanding voting securities of the Fund or a majority of the Board, and (ii) the vote of a majority of the Independent Trustees of the Fund, cast in person at a meeting called for the purpose of voting on such approval. See "VOTING." The Investment Management Agreement will terminate automatically if assigned (as defined in the Investment Company Act), and is terminable at any time without penalty (i) by the majority of members of the Fund's Board or by vote of a majority of the outstanding voting securities of the Fund on sixty (60) days' written notice to the Investment Manager; or (ii) upon sixty (60) days' written notice to the Fund by the Investment Manager. A discussion regarding the basis for the Board's approval of the Investment Management Agreement will be available in the Fund's semi-annual report to Shareholders for the six-month period ended September 30, 2023.

The Investment Management Agreement provides that, in the absence of willful misfeasance, bad faith, gross negligence or reckless disregard of its obligations to the Fund, the Investment Manager and any partner, director, officer or employee of the Investment Manager, or any of their affiliates, executors, heirs, assigns, successors or other legal representatives, will not be liable to the Fund for any error of judgment, for any mistake of law or for any act or omission by the person in connection with the performance of services to the Fund. The Investment Management Agreement also provides for indemnification, to the fullest extent permitted by law, by the Fund, of the Investment Manager, or any partner, director, officer or employee of the Investment Manager, and any of their affiliates, executors, heirs, assigns, successors or other legal representatives, against any liability or expense to which the person may be liable that arises in connection with the performance of services to the Fund, so long as the liability or expense is not incurred by reason of the person's willful misfeasance, bad faith, gross negligence or reckless disregard of its obligations to the Fund.

INVESTMENT MANAGEMENT FEE

The Fund pays to the Investment Manager an investment management fee (the "Investment Management Fee") in consideration of the advisory and other services provided by the Investment Manager to the Fund. Pursuant to the Investment Management Agreement, the Fund pays the Investment Manager a quarterly Investment Management Fee equal to 0.50% on an annualized basis of the Fund's net assets as of each quarter-end. The Investment Management Fee will be paid to the Investment Manager before giving effect to any repurchase of Shares in the Fund effective as of that date, and will decrease the net profits or increase the net losses of the Fund that are credited to its Shareholders. NAV means the total value of all assets of the Fund, less an amount equal to all accrued debts, liabilities and obligations of the Fund.

The Investment Manager has entered into an investment management fee limitation agreement (the “Management Fee Limitation Agreement”) with the Fund, whereby the Investment Manager has agreed to waive 0.40% of its Investment Management Fee. The Management Fee Limitation Agreement became effective for one year following the Commencement of Operations and automatically renews for consecutive one-year terms thereafter (each, a “Current Term”). Neither the Fund nor the Investment Manager may terminate the Management Fee Limitation Agreement during a Current Term.

ADMINISTRATIVE SERVICES AGREEMENT

The administrative services agreement (the “Administrative Services Agreement”) between the Investment Manager and the Fund became effective as of the Commencement of Operations of the Fund, and continued in effect for an initial two-year term. Thereafter, the Administrative Services Agreement is continuing in effect from year to year provided such continuance is specifically approved at least annually by the Board, including a majority of the Independent Trustees of the Fund. The Administrative Services Agreement will terminate automatically if assigned (as defined in the Investment Company Act), and is terminable at any time without penalty upon no less than sixty (60) days’ written notice to the Fund by either the Board or the Investment Manager.

Pursuant to the Administrative Services Agreement with the Fund, the Investment Manager is entitled to 0.10% on an annualized basis of the Fund’s net assets as of each quarter-end for providing administrative services to the Fund. Such services include the review of shareholder reports and other filings with the SEC; oversight of the Fund’s primary service providers; periodic due diligence reviews of the Fund’s primary service providers; coordination and negotiation of all of the contracts and pricing relating to the Fund’s primary service providers, with the advice of Fund counsel; providing information to the Board relating to the review and selection of the Fund’s primary service providers; and all such other duties or services necessary for the appropriate administration of the Fund that are incidental to the foregoing services.

DISTRIBUTOR

UMB Distribution Services, LLC (the “Distributor”) is the distributor (also known as principal underwriter) of the Shares of the Fund and is located at 235 W. Galena Street, Milwaukee, Wisconsin. The Distributor is a registered broker-dealer and is a member of the Financial Industry Regulatory Authority, Inc. (“FINRA”).

Under a Distribution Agreement with the Fund, the Distributor acts as the agent of the Fund in connection with the continuous offering of Shares of the Fund. The Distributor continually distributes Shares of the Fund on a best efforts basis. The Distributor has no obligation to sell any specific quantity of Fund Shares. The Distributor and its officers have no role in determining the investment policies or which securities are to be purchased or sold by the Fund.

The Distributor may enter into agreements with selected broker-dealers, banks or other financial intermediaries for distribution of Shares of the Fund. With respect to certain financial intermediaries and related fund “supermarket” platform arrangements, the Fund and/or the Investment Manager, rather than the Distributor, typically enter into such agreements. These financial intermediaries may charge a fee for their services and may receive shareholder service or other fees from parties other than the Distributor. These financial intermediaries may otherwise act as processing agents and are responsible for promptly transmitting purchase, repurchase and other requests to the Fund.

Investors who purchase Shares through financial intermediaries will be subject to the procedures of those intermediaries through which they purchase Shares, which may include charges, investment minimums, cutoff times and other restrictions in addition to, or different from, those listed herein. Information concerning any charges or services will be

provided to customers by the financial intermediary through which they purchase Shares. Investors purchasing Shares of the Fund through financial intermediaries should acquaint themselves with their financial intermediary's procedures and should read the Prospectus in conjunction with any materials and information provided by their financial intermediary. The financial intermediary, and not its customers, will be the shareholder of record, although customers may have the right to vote Shares depending upon their arrangement with the intermediary. The Distributor does not receive compensation from the Fund for its distribution services. The Investment Manager pays the Distributor a fee for certain distribution-related services.

Pursuant to the Distribution Agreement, the Distributor is solely responsible for its costs and expenses incurred in connection with its qualification as a broker-dealer under state or federal laws. The Distribution Agreement also provides that the Fund will indemnify the Distributor and its affiliates and certain other persons against certain liabilities. Specifically, the Distribution Agreement provides that the Fund shall indemnify, defend and hold the Distributor, its affiliates and each of their respective members, managers, directors, officers, employees, representatives and any person who controls or previously controlled the Distributor (collectively, the "Distributor Indemnitees"), free and harmless from and against any and all losses, claims, demands, liabilities, damages and expenses (including the costs of investigating or defending any alleged losses, claims, demands, liabilities, damages or expenses and any reasonable counsel fees incurred in connection therewith) (collectively, "Losses") that any Distributor Indemnitee may incur arising out of or relating to (i) the Distributor serving as distributor of the Fund; (ii) the Fund's breach of any of its obligations, representations, warranties or covenants; (iii) the Fund's failure to comply with any applicable securities laws or regulations; or (iv) any claim that the registration statement, prospectus, shareholder reports, sales literature and advertising materials or other information filed or made public by the Fund (as from time to time amended) include or included an untrue statement of a material fact or omitted to state a material fact required to be stated therein or necessary in order to make the statements therein not misleading, provided, however, that the Fund's obligation to indemnify any of the Distributor Indemnitees shall not be deemed to cover any Losses arising out of any untrue statement or alleged untrue statement or omission or alleged omission made in the registration statement, prospectus, annual or interim report, or any such advertising materials or sales literature in reliance upon and in conformity with information relating to the Distributor and furnished to the Fund by the Distributor in writing and acknowledging the purpose of its use. In no event shall anything contained in the Distribution Agreement be so construed as to protect the Distributor against any liability to the Fund or its shareholders to which the Distributor would otherwise be subject by reason of willful misfeasance, bad faith, or gross negligence in the performance of its duties or by reason of its reckless disregard of its obligations.

The Investment Manager and/or its affiliates may make payments to selected affiliated or unaffiliated third parties (including the parties who have entered into selling agreements with the Distributor) from time to time in connection with the distribution of Shares and/or the servicing of Shareholders and/or the Fund. These payments will be made out of the Investment Manager's and/or affiliates' own assets and will not represent an additional charge to the Fund. The amount of such payments may be significant in amount and the prospect of receiving any such payments may provide such third parties or their employees with an incentive to favor sales of Shares of the Fund over other investment options. Contact your financial intermediary for details about revenue sharing payments it receives or may receive.

The following table summarizes the compensation payable to the Distributor or in connection with this offering.

Agreement	Fees	Maximum Fee
Distribution Agreement	Distribution Services ⁽¹⁾	N/A ⁽²⁾

⁽¹⁾ The Distributor is compensated by the Investment Manager (and not the Fund) for providing certain distribution services, including out-of-pocket expenses. The fee is subject to a minimum annual fee of \$15,000.

⁽²⁾ Paid by the Investment Manager and not the Fund.

ADMINISTRATION

The Fund has retained the Administrator, UMB Fund Services, Inc., whose principal business address is 235 West Galena Street, Milwaukee, WI 53212, to provide administrative services, and to assist with operational needs. The Administrator provides such services to the Fund pursuant to an administration agreement between the Fund and the Administrator (the "Administration Agreement"). The Administrator is responsible directly or through its agents for, among other things, providing the following services to each of the Fund; (1) maintaining a list of Shareholders and generally performing all actions related to the issuance and repurchase of Shares of the Fund, if any, including delivery of trade confirmations and capital statements; (2) providing certain administrative, clerical and bookkeeping services; (3) providing transfer agency services, services related to the payment of distributions, and accounting services; (4) computing the NAV of the Fund in accordance with U.S. generally accepted accounting principles ("GAAP") and procedures defined in consultation with the Investment Manager; (5) overseeing the preparation of semi-annual and annual financial statements of the Fund in accordance with GAAP, quarterly reports of the operations of the Fund and information required for tax returns; (6) supervising regulatory compliance matters and preparing certain regulatory filings; and (7) performing additional services, as agreed upon, in connection with the administration of the Fund. The Administrator may from time to time delegate its responsibilities under the Administration Agreement to one or more parties selected by the Administrator, including its affiliates or affiliates of the Investment Manager.

The Fund pays the Administrator an annual fee beginning at 0.04% of the Fund's net assets and decreasing as net assets reach certain levels.

In consideration for these services, the Fund pays the Administrator a minimum quarterly administration fee of \$12,500, or \$50,000 on an annualized basis (the "Administration Fee"). The Administration Fee is paid to the Administrator out of the assets of the Fund and therefore decreases the net profits or increases the net losses of the Fund. The Administrator also is reimbursed by the Fund for out-of-pocket expenses relating to services provided to the Fund and receives a fee for transfer agency services. The Administration Fee and the other terms of the Administration Agreement may change from time to time as may be agreed to by the Fund and the Administrator.

The Administration Agreement provides that, in the absence of willful misfeasance, bad faith, gross negligence or reckless disregard of its obligations to the Fund, the Administrator and any partner, director, officer or employee of the Administrator, or any of their affiliates, executors, heirs, assigns, successors or other legal representatives, will not be liable to the Fund for any error of judgment, for any mistake of law or for any act or omission by the person in connection with the performance of administration services for the Fund. The Administration Agreement also provides for indemnification, to the fullest extent permitted by law, by the Fund to the Administrator, or any partner, director, officer or employee of the Administrator, and any of their affiliates, executors, heirs, assigns, successors or other legal

representatives, against any liability or expense to which the person may be liable that arises in connection with the performance of services to the Fund, so long as the liability or expense is not incurred by reason of the person's willful misfeasance, bad faith, gross negligence or reckless disregard of its obligations to the Fund.

CUSTODIAN

UMB Bank, n.a. (the "Custodian"), an affiliate of the Administrator, serves as the primary custodian of the assets of the Fund, and may maintain custody of such assets with U.S. and non-U.S. subcustodians (which may be banks and trust companies), securities depositories and clearing agencies in accordance with the requirements of Section 17(f) of the Investment Company Act and the rules thereunder. Assets of the Fund are not held by the Investment Manager or commingled with the assets of other accounts other than to the extent that securities are held in the name of the Custodian or U.S. or non-U.S. subcustodians in a securities depository, clearing agency or omnibus customer account of such custodian. The Custodian's principal business address is 1010 Grand Blvd., Kansas City, MO 64106.

FUND EXPENSES

The Fund pays all of its expenses. The expenses of the Fund include, but are not limited to, any fees and expenses in connection with the offering and issuance of Shares; all fees and expenses reasonably incurred in connection with the operation of the Fund; all fees and expenses directly related to portfolio transactions and positions for the Fund's account such as direct and indirect expenses associated with the Fund's investments, and enforcing the Fund's rights in respect of such investments; quotation or valuation expenses; the Investment Management Fee, the Administrative Services Fee and the Administration Fee; brokerage commissions; interest and fees on any borrowings by the Fund; professional fees; research expenses (including, without limitation, expenses of consultants who perform fund manager due diligence research); fees and expenses of outside legal counsel (including fees and expenses associated with the review of documentation for prospective investments by the Fund), including foreign legal counsel; accounting, auditing and tax preparation expenses; fees and expenses in connection with repurchase offers and any repurchases or redemptions of Shares; taxes and governmental fees (including tax preparation fees); fees and expenses of any custodian, subcustodian, transfer agent, and registrar, and any other agent of the Fund; all costs and charges for equipment or services used in communicating information regarding the Fund's transactions with any custodian or other agent engaged by the Fund; bank services fees; costs and expenses relating to any amendment of the Agreement and Declaration of Trust or other organizational documents of the Fund; expenses of preparing, amending, printing, and distributing the Prospectus and any other sales material (and any supplements or amendments thereto), reports, notices, other communications to Shareholders, and proxy materials; expenses of preparing, printing, and filing reports and other documents with government agencies; expenses of Shareholders' meetings, including the solicitation of proxies in connection therewith; expenses of corporate data processing and related services; shareholder recordkeeping and account services, fees, and disbursements; expenses relating to investor and public relations; fees and expenses of the members of the Board who are not employees of the Investment Manager or its affiliates; insurance premiums; Extraordinary Expenses (as defined below); and all costs and expenses incurred as a result of dissolution, winding-up and termination of the Fund. The Fund may need to sell portfolio securities to pay fees and expenses, which could cause the Fund to realize taxable gains.

"Extraordinary Expenses" means all expenses incurred by the Fund outside of the ordinary course of its business, including, without limitation, costs incurred in connection with any claim, litigation, arbitration, mediation, government investigation or dispute and the amount of any judgment or settlement paid in connection therewith, or the enforcement of the rights against any person or entity; costs and expenses for indemnification or contribution payable to any person or entity; expenses of a reorganization, restructuring or merger, as applicable; expenses of holding, or soliciting proxies

for, a meeting of shareholders (except to the extent relating to items customarily addressed at an annual meeting of a registered closed-end management investment company); and the expenses of engaging a new administrator, custodian, transfer agent or escrow agent.

The Investment Manager bears all of its expenses and costs incurred in providing investment advisory services to the Fund, including travel and other expenses related to the selection and monitoring of investments. In addition, the Investment Manager is responsible for the payment of the compensation and expenses of those officers of the Fund affiliated with the Investment Manager, and making available, without expense to the Fund, the services of such individuals, subject to their individual consent to serve and to any limitations imposed by law.

The Fund bears directly certain ongoing offering costs associated with any periodic offers of Shares which will be expensed as they are incurred. Offering costs cannot be deducted by the Fund or the Shareholders.

The Fund's fees and expenses will decrease the net profits or increase the net losses of the Fund that are credited to Shareholders.

VOTING

Each Shareholder will have the right to cast a number of votes, based on the value of such Shareholder's Shares, at any meeting of Shareholders called by the Board. Except for the exercise of such voting privileges, Shareholders will not be entitled to participate in the management or control of the Fund's business, and may not act for or bind the Fund.

CONFLICTS OF INTEREST

The Fund may be subject to a number of actual and potential conflicts of interest.

The Investment Manager and its affiliates engage in financial advisory activities that are independent from, and may from time to time conflict with, those of the Fund. In the future, there might arise instances where the interests of such affiliates conflict with the interests of the Fund. The Investment Manager and its affiliates may provide services to, invest in, advise, sponsor and/or act as investment manager to investment vehicles and other persons or entities (including prospective investors in the Fund) which may have structures, investment objectives and/or policies that are similar to (or different than) those of the Fund; which may compete with the Fund for investment opportunities. In addition, the Investment Manager, its affiliates and their respective clients may themselves invest in securities that would be appropriate for the Fund. By acquiring Shares, each Shareholder will be deemed to have acknowledged the existence of any such actual and potential conflicts of interest.

Although the Investment Manager and its affiliates will seek to allocate investment opportunities among the Fund and their other clients in a fair and reasonable manner, there can be no assurance that an investment opportunity which comes to the attention of the Investment Manager and its affiliates will be appropriate for the Fund or will be referred to the Fund. The Investment Manager and its affiliates are not obligated to refer any investment opportunity to the Fund.

The directors, partners, trustees, managers, members, officers and employees of the Investment Manager and its affiliates may buy and sell securities or other investments for their own accounts (including through funds managed by the Investment Manager or its affiliates). As a result of differing trading and investment strategies or constraints, investments may be made by directors, partners, trustees, managers, members, officers and employees that are the same, different from or made at different times than investments made for the Fund. To reduce the possibility that the Fund will be materially adversely affected by the personal trading described above, each of the Fund and the Investment

Manager have adopted codes of ethics (collectively, the “Codes of Ethics”) in compliance with Section 17(j) of the Investment Company Act that restricts securities trading in the personal accounts of investment professionals and others who normally come into possession of information regarding the portfolio transactions of the Fund. The Codes of Ethics are available on the EDGAR Database on the SEC’s website at <https://www.sec.gov>, and copies may be obtained, after paying a duplicating fee, by email at publicinfo@sec.gov.

TENDER OFFERS/OFFERS TO REPURCHASE

A substantial portion of the Fund’s investments are illiquid. For this reason, the Fund is structured as a closed-end fund, which means that the Shareholders will not have the right to redeem their Shares on a daily basis. In addition, the Fund does not expect any trading market to develop for the Shares. As a result, if investors decide to invest in the Fund, they will have very limited opportunity to sell their Shares.

At the discretion of the Board and provided that it is in the best interests of the Fund and the Shareholders to do so, the Fund intends to provide a limited degree of liquidity to the Shareholders by conducting repurchase offers generally quarterly with a Valuation Date (as defined below) on or about March 31, June 30, September 30 and December 31 of each year.

The Board will consider the following factors, among others, in making its determination for the Fund to make each repurchase offer:

- the recommendation of the Investment Manager;
- whether any Shareholders have requested to tender Shares or portions thereof to the Fund;
- the liquidity of the Fund’s assets (including fees and costs associated with withdrawing from investments);
- the investment plans and working capital requirements of the Fund;
- the relative economies of scale with respect to the size of the Fund;
- the history of the Fund in repurchasing Shares or portions thereof;
- the availability of information as to the value of the Fund’s assets;
- the economic condition of the securities markets and the economy generally as well as political, national or international developments or current affairs; and

- the anticipated tax consequences to the Fund of any proposed repurchases of Shares or portions thereof.

Each repurchase offer ordinarily will be limited to the repurchase of approximately 5% of the Fund's Shares but the Board will set an amount based on relevant factors, including the liquidity of the Fund's positions and the Shareholders' desire for liquidity. A Shareholder whose Shares (or a portion thereof) are repurchased by the Fund will not be entitled to a return of any sales charge that was charged in connection with the Shareholder's purchase of the Shares.

Shares will be repurchased at their NAV determined as of approximately March 31, June 30, September 30 and December 31, as applicable (each such date, a "Valuation Date"). Shareholders tendering Shares for repurchase will be asked to give written notice of their intent to do so by the date specified in the notice describing the terms of the applicable repurchase offer. Shareholders who tender may not have all of the tendered Shares repurchased by the Fund. If over-subscriptions occur, the Fund may elect to repurchase less than the full amount that a Shareholder requests to be repurchased. In such an event, the Fund may repurchase only a pro rata portion of the amount tendered by each Shareholder.

The decision to offer to repurchase Shares is in the complete and absolute discretion of the Board, which may, under certain circumstances, elect not to offer to repurchase Shares. In certain circumstances, the Board may require a Shareholder to tender its Shares.

A Shareholder who tenders for repurchase only a portion of its Shares in the Fund will be required to maintain a minimum account balance of \$25,000. If a Shareholder tenders a portion of its Shares and the repurchase of that portion would cause the Shareholder's account balance to fall below this required minimum (except as a result of pro ration), the Fund reserves the right to reduce the portion of the Shares to be purchased from the Shareholder so that the required minimum balance is maintained. Such minimum capital account balance requirement may also be waived by the Board in its sole discretion, subject to applicable federal securities laws.

TENDER/REPURCHASE PROCEDURES

Due to liquidity restraints associated with the Fund's investments in Investment Funds, it is presently expected that, under the procedures applicable to the repurchase of Shares, Shares will be valued as of the applicable Valuation Date. The Fund will generally pay the value of the Shares repurchased (or as discussed below, 98% of such value if all Shares owned by a Shareholder are repurchased) no later than the 65th day after the deadline for Shareholders to tender Shares for repurchase as set forth in the applicable repurchase offer. This amount will be subject to adjustment within five business days after completion of the annual audit of the Fund's financial statements for the fiscal year in which the repurchase is effective. Shares may be repurchased prior to Investment Fund audits. To mitigate any effects of this, if all Shares owned by a Shareholder are repurchased, the Shareholder will receive an initial payment equal to 98% of the estimated value of the Shares (after adjusting for fees, expenses, reserves or other allocations or redemption charges) no later than the 65th day after the deadline for Shareholders to tender Shares for repurchase as set forth in the applicable repurchase offer, subject to audit adjustment, and the balance due will be determined and paid within five business days after completion of the Fund's annual audit.

Under these procedures, Shareholders will have to decide whether to tender their Shares for repurchase without the benefit of having current information regarding the value of the Shares as of the Valuation Date. The Shareholder may inquire of the Fund, at the telephone number indicated within this Prospectus, as to the value of the Shares last determined. In addition, there will be a substantial period of time between the date as of which the Shareholders must tender the Shares and the date they can expect to receive payment for their Shares from the Fund. However, promptly after the expiration of a repurchase offer, Shareholders whose Shares are accepted for repurchase may be

given non-interest bearing, non-transferable promissory notes by the Fund representing the Fund's obligation to pay for repurchased Shares. Any promissory notes will be held by the Administrator and can be provided upon request by calling UMB Fund Services, Inc. at (877) 997-9971. Payments for repurchased Shares may be delayed under circumstances where the Fund has determined to redeem its interest in Investment Funds to make such payments, but has experienced delays in receiving payments from such Investment Funds.

Repurchase of Shares by the Fund are subject to certain regulatory requirements imposed by SEC rules. Notwithstanding the foregoing, the Fund may postpone payment of the repurchase price and may suspend repurchases during any period or at any time.

In accordance with the terms and conditions of the Agreement and Declaration of Trust, the Fund may cause a mandatory repurchase or redemption of all or some of the Shares of a Shareholder, or any person acquiring Shares from or through a Shareholder, in the event that the Board determines or has reason to believe, in its sole discretion, that: (i) its Shares have been transferred to, or has vested in, any person, by operation of law in connection with the death, divorce, bankruptcy, insolvency, or adjudicated incompetence of a Shareholder; (ii) ownership of the Shares by such Shareholder or other person will cause the Fund to be in violation of, or subject the Fund or the Investment Manager to additional registration or regulation under the securities, commodities, or other laws of the United States or any other jurisdiction; (iii) continued ownership of the Shares by such Shareholders may be harmful or injurious to the business or reputation of the Fund or the Investment Manager, or may subject the Fund or any Shareholders to an undue risk of adverse tax or other fiscal consequences; (iv) any representation or warranty made by a Shareholder in connection with the acquisition of Shares was not true when made or has ceased to be true, or the Shareholder has breached any covenant made by it in connection with the acquisition of Shares; or (v) it would be in the best interests of the Fund for the Fund to cause a mandatory redemption of such Shares in circumstances where the Board determines that doing so is in the best interests of the Fund in a manner as will not discriminate unfairly against any Shareholder.

TRANSFERS OF SHARES

No person shall become a substituted Shareholder of the Fund without the consent of the Fund, which consent may be withheld in its sole discretion. Shares held by Shareholders may be transferred only: (i) by operation of law in connection with the death, divorce, bankruptcy, insolvency, or adjudicated incompetence of the Shareholder; or (ii) under other limited circumstances, with the consent of the Board (which may be withheld in its sole discretion and is expected to be granted, if at all, only under extenuating circumstances).

Notice to the Fund of any proposed transfer must include evidence satisfactory to the Board that the proposed transferee, at the time of transfer, meets any requirements imposed by the Fund with respect to investor eligibility and suitability. See "INVESTOR QUALIFICATIONS." Notice of a proposed transfer of a Share must also be accompanied by a properly completed investor application in respect of the proposed transferee. In connection with any request to transfer Shares, the Fund may require the Shareholder requesting the transfer to obtain, at the Shareholder's expense, an opinion of counsel selected by the Fund as to such matters as the Fund may reasonably request. The Board generally will not consent to a transfer of Shares by a Shareholder (i) unless such transfer is to a single transferee, or (ii) if, after the transfer of the Shares, the balance of the account of each of the transferee and transferor is less than \$25,000. Each transferring Shareholder and transferee may be charged reasonable expenses, including, but not limited to, attorneys' and accountants' fees, incurred by the Fund in connection with the transfer.

Any transferee acquiring Shares by operation of law in connection with the death, divorce, bankruptcy, insolvency, or adjudicated incompetence of the Shareholder, will be entitled to the distributions allocable to the Shares so acquired, to transfer the Shares in accordance with the terms of the Agreement and Declaration of Trust and to tender the Shares for repurchase by the Fund, but will not be entitled to the other rights of a Shareholder unless and until the transferee becomes a substituted Shareholder as specified in the Agreement and Declaration of Trust. If a Shareholder transfers Shares with the approval of the Board, the Fund shall as promptly as practicable take all necessary actions so that each transferee or successor to whom the Shares are transferred is admitted to the Fund as a Shareholder.

By subscribing for Shares, each Shareholder agrees to indemnify and hold harmless the Fund, the Board, the Investment Manager, and each other Shareholder, and any affiliate of the foregoing against all losses, claims, damages, liabilities, costs, and expenses (including legal or other expenses incurred in investigating or defending against any losses, claims, damages, liabilities, costs, and expenses or any judgments, fines, and amounts paid in settlement), joint or several, to which such persons may become subject by reason of or arising from any transfer made by that Shareholder in violation of the Agreement and Declaration of Trust or any misrepresentation made by that Shareholder in connection with any such transfer.

ANTI-MONEY LAUNDERING

If the Fund, the Investment Manager or any governmental agency believes that the Fund has sold Shares to, or is otherwise holding assets of, any person or entity that is acting, directly or indirectly, in violation of U.S., international or other anti-money laundering laws, rules, regulations, treaties or other restrictions, or on behalf of any suspected terrorist or terrorist organization, suspected drug trafficker, or senior foreign political figure(s) suspected of engaging in corruption, the Fund, the Investment Manager or such governmental agency may freeze the assets of such person or entity invested in the Fund or suspend the repurchase of Shares. The Fund may also be required to, or deem it necessary or advisable to, remit or transfer those assets to a governmental agency, in some cases without prior notice to the investor.

CREDIT FACILITY

The Fund may enter into one or more credit agreements or other similar agreements negotiated on market terms (each, a "Borrowing Transaction") with one or more banks or other financial institutions which may or may not be affiliated with the Investment Manager (each, a "Financial Institution") as chosen by the Investment Manager and approved by the Board. The Fund may borrow under a credit facility for a number of reasons, including without limitation, to pay fees and expenses, to make annual income distributions and to satisfy certain repurchase offers in a timely manner to ensure liquidity for the investors. To facilitate such Borrowing Transactions, the Fund may pledge its assets to the Financial Institution.

CALCULATION OF NET ASSET VALUE

GENERAL

The Fund calculates its NAV as of the close of business on the last day of each quarter and at such other times as the Board may determine, including in connection with repurchases of Shares, in accordance with the procedures described below or as may be determined from time to time in accordance with policies established by the Board. Shareholders will receive the estimated NAV of the Fund, free of charge upon request.

In December 2020, the SEC adopted a new rule providing a framework for fund valuation practices (“Rule 2a-5”). Rule 2a-5 establishes requirements for determining fair value in good faith for purposes of the Investment Company Act. Rule 2a-5 permits fund boards to designate certain parties to perform fair value determinations, subject to board oversight and certain other conditions. Rule 2a-5 also defines when market quotations are “readily available” for purposes of the Investment Company Act and the threshold for determining whether a fund must fair value a security. In connection with Rule 2a-5, the SEC also adopted related recordkeeping requirements and is rescinding previously issued guidance, including with respect to the role of a board in determining fair value and the accounting and auditing of fund investments. Effective September 8, 2022, and pursuant to the requirements of Rule 2a-5, the Board designated the Investment Manager as the Fund’s valuation designee (in this capacity, the “Valuation Designee”) to perform fair value determinations.

The Board has approved valuation procedures for the Fund (the “Valuation Procedures”). The Valuation Procedures provide that the Fund will value its investments in direct investments and Investment Funds at fair value. The Board has delegated day to day responsibility for fair value determinations in accordance with the Valuation Procedures to the Valuation Designee, subject to the oversight of the Board.

In accordance with the Valuation Procedures, fair value as of each quarter-end or other applicable accounting periods, as applicable, ordinarily will be the value determined as of such date by each Investment Fund in accordance with the Investment Fund’s valuation policies and reported at the time of the Fund’s valuation. As a general matter, the fair value of the Fund’s interest in an Investment Fund will represent the amount that the Fund could reasonably expect to receive from the Investment Fund if the Fund’s interest was redeemed at the time of valuation, based on information reasonably available at the time the valuation is made and that the Fund believes to be reliable. In the event that the Investment Fund does not report a quarter-end value to the Fund on a timely basis, the Fund will determine the fair value of such Investment Fund based on the most recent final or estimated value reported by the Investment Fund, as well as any other relevant information available at the time the Fund values its portfolio. Using the nomenclature of the hedge fund industry, any values reported as “estimated” or “final” values are expected to reasonably reflect market values of securities when available or fair value as of the Fund’s valuation date. A substantial amount of time may elapse between the occurrence of an event necessitating the pricing of Fund assets and the receipt of valuation information from the Underlying Manager of an Investment Fund.

Prior to the Fund investing in any Investment Fund, the Investment Manager will conduct a due diligence review of the valuation methodologies utilized by the Investment Fund, which as a general matter will utilize market values when available, and otherwise will utilize principles of fair value that the Investment Manager reasonably believe to be consistent, in all material respects, with those used by the Fund in valuing its own investments. Although the Valuation Procedures provide that the Investment Manager will review the valuations provided by the Underlying Managers to the Investment Funds, none of the Board or the Investment Manager will be able to confirm independently the accuracy of valuations provided by such Underlying Managers, which may be unaudited.

The Fund’s Valuation Procedures require the Investment Manager to take reasonable steps in light of all relevant circumstances to value the Fund’s portfolio. The Investment Manager will consider such information, and may conclude in certain circumstances that the information provided by an Underlying Manager does not represent the fair value of the Fund’s interests in the Investment Fund. Although redemptions of interests in Investment Funds are subject to advance notice requirements, Investment Funds will typically make available NAV information to holders which will represent the price at which, even in the absence of redemption activity, the Investment Fund would have effected a redemption if any such requests had been timely made or if, in accordance with the terms of the Investment Fund’s governing documents, it would be necessary to effect a mandatory redemption. Following procedures adopted by the Board, the Investment

Manager will consider whether it is appropriate, in light of all relevant circumstances, to value such interests at the NAV as reported by the Underlying Manager at the time of valuation, or whether to adjust such value to reflect a premium or discount to NAV. In accordance with U.S. generally accepted accounting principles and industry practice, the Fund may not always apply a discount in cases where there is no contemporaneous redemption activity in a particular Investment Fund. In other cases, as when an Investment Fund imposes extraordinary restrictions on redemptions, when other extraordinary circumstances exist, or when there have been no recent transactions in Investment Fund interests, the Fund may determine that it is appropriate to apply a discount to the NAV of the Investment Fund. Any such decision will be made in good faith, and subject to the review and supervision of the Board.

The valuations reported by the Underlying Managers, upon which the Fund calculates its quarter-end NAV and the NAV of each Share, may be subject to later adjustment or revision, based on information reasonably available at that time. For example, any “estimated” values from Investment Funds may be revised and fiscal year-end NAV calculations of the Investment Funds may be audited by their independent auditors and may be revised as a result of such audits. Other adjustments may occur from time to time. Because such adjustments or revisions, whether increasing or decreasing the NAV of the Fund at the time they occur, relate to information available only at the time of the adjustment or revision, the adjustment or revision may not affect the amount of the repurchase proceeds of the Fund received by Shareholders who had their Shares in the Fund repurchased at a NAV calculated prior to such adjustments and received their repurchase proceeds, subject to the ability of the Fund to adjust or recoup the repurchase proceeds received by Shareholders under certain circumstances. As a result, to the extent that such subsequently adjusted valuations from the Underlying Managers or revisions to the NAV of an Investment Fund adversely affect the Fund’s NAV, the outstanding Shares may be adversely affected by prior repurchases to the benefit of Shareholders who had their Shares repurchased at a NAV higher than the adjusted amount. Conversely, any increases in the NAV resulting from such subsequently adjusted valuations may be entirely for the benefit of the outstanding Shares and to the detriment of Shareholders who previously had their Shares repurchased at a NAV lower than the adjusted amount. The same principles apply to the purchase of Shares. New Shareholders may be affected in a similar way.

The Valuation Procedures provide that, where deemed appropriate by the Investment Manager and consistent with the Investment Company Act, investments in Investment Funds may be valued at cost. Cost will be used only when cost is determined to best approximate the fair value of the particular security under consideration. For example, cost may not be appropriate when the Fund is aware of sales of similar securities to third parties at materially different prices or in other circumstances where cost may not approximate fair value (which could include situations where there are no sales to third parties). In such a situation, the Fund’s investment will be revalued in a manner that the Investment Manager, in accordance with the Valuation Procedures, determines in good faith best reflects approximate market value. The Board is responsible for ensuring that the Valuation Procedures utilized by the Investment Manager is fair to the Fund and consistent with applicable regulatory guidelines.

To the extent the Fund invests in securities or other instruments that are not investments in Investment Funds, the Fund will generally value such assets as described below. Securities traded (1) on one or more of the U.S. national securities exchanges or the OTC Bulletin Board will be valued at their last sales price, and (2) on NASDAQ will be valued at the NASDAQ Official Closing Price (“NOCP”), at the close of trading on the exchanges or markets where such securities are traded for the business day as of which such value is being determined. Securities traded on NASDAQ for which the NOCP is not available will be valued at the mean between the closing bid and asked prices in this market. Securities traded on a foreign securities exchange generally will be valued at their closing prices on the exchange where such securities are primarily traded and translated into U.S. dollars at the current exchange rate. If an event occurs between the close of the foreign exchange and the computation of the Fund’s NAV that would materially affect the value of the security, the value of such a security will be adjusted to its fair value. Except as specified above, the value of a security,

derivative, or synthetic security that is not actively traded on an exchange shall be determined by an unaffiliated pricing service that may use actual trade data or procedures using market indices, matrices, yield curves, specific trading characteristics of certain groups of securities, pricing models, or combinations of these. The Investment Manager will monitor the value assigned to each security by the pricing service to determine if they believe the value assigned to a security is correct. If the Investment Manager believes that the value received from the pricing service is incorrect, then the value of the security will be its fair value as determined in accordance with the Valuation Procedures.

Debt securities will be valued in accordance with the Valuation Procedures, which generally provide for using a third-party pricing system, agent, or dealer selected by the Investment Manager, which may include the use of valuations furnished by a pricing service that employs a matrix to determine valuations for normal institutional size trading units. The Board will monitor periodically the reasonableness of valuations provided by any such pricing service. Debt securities with remaining maturities of 60 days or less, absent unusual circumstances, will be valued at amortized cost, so long as such valuations are determined by the Board to represent fair value.

Assets and liabilities initially expressed in foreign currencies will be converted into U.S. dollars using foreign exchange rates provided by a pricing service. Trading in foreign securities generally is completed, and the values of such securities are determined, prior to the close of securities markets in the United States. Foreign exchange rates are also determined prior to such close. On occasion, the values of securities and exchange rates may be affected by events occurring between the time as of which determination of such values or exchange rates are made and the time as of which the NAV of the Fund is determined. When such events materially affect the values of securities held by the Fund or its liabilities, such securities and liabilities may be valued at fair value as determined in good faith in accordance with procedures approved by the Board.

In general, fair value represents a good faith approximation of the current value of an asset and will be used when there is no public market or possibly no market at all for the asset. The fair values of one or more assets may not be the prices at which those assets are ultimately sold. In such circumstances, the Investment Manager and/or the Board, in consultation with the Administrator, will reevaluate the Fund's fair value methodology to determine, what, if any, adjustments should be made to the methodology.

Although the Valuation Procedures approved by the Board and the Fund provide that the Investment Manager will review the valuations provided by the Administrator (via the Underlying Managers or their administrators), neither the Investment Manager nor the Administrator will be able to confirm independently the accuracy of any valuations provided thereby.

Prospective investors should be aware that situations involving uncertainties as to the valuation of portfolio positions could have an adverse effect on the Fund's net assets if the judgments of the Board and/or the Investment Manager (in reliance on the Investment Funds and/or their administrators) regarding appropriate valuations should prove incorrect. The Fund may desire to dispose of an interest in an Investment Fund, but be unable to dispose of such interest, and could therefore be obligated to continue to hold the interests for an extended period of time. In such a case, the Administrator, upon consultation with the Investment Manager, may continue to value the interests in accordance with the Valuation Procedures, without the benefit of an Underlying Manager's or its administrator's valuations, and may, if so instructed by the Investment Manager, in its sole discretion, discount the value of the interests, if applicable, in accordance with the Valuation Procedures.

Applicable federal tax requirements generally limit the degree to which the Fund may invest in the Subsidiaries to an amount not exceeding 25% of its total assets. The Subsidiaries price their respective portfolio investments pursuant to the same pricing and valuation methodologies and procedures employed by the Fund. The Subsidiaries offer to redeem

all or a portion of their respective shares at the current net asset value per share every day the Fund is open for business. The value of shares of the Cayman Subsidiary and the Onshore Subsidiary will fluctuate with the value of their respective portfolio investments.

SUSPENSION OF CALCULATION OF NET ASSET VALUE

As noted above, the Fund calculates its NAV as of the close of business on the last day of each quarter. However, there may be circumstances where it may not be practicable to determine an NAV, such as during any period when the principal stock exchanges for securities in which Investment Funds have invested their assets are closed other than for weekends and customary holidays (or when trading on such exchanges is restricted or suspended). In such circumstances, the Board (after consultation with the Investment Manager) may suspend the calculation of NAV. The Fund will not accept subscriptions for Shares if the calculation of NAV is suspended, and the suspension may require the termination of a pending repurchase offer by the Fund (or the postponement of the Valuation Date for a repurchase offer). Notwithstanding a suspension of the calculation of NAV, the Fund will be required to determine the value of its assets and report NAV in its semi-annual and annual reports to Shareholders, and in its reports on Form N-PORT filed with the SEC after the end of the first and third quarters of the Fund's fiscal year. The Fund will resume calculation of NAV after the Board (in consultation with the Investment Manager) determines that conditions no longer require suspension of the calculation of NAV.

TAXES

INTRODUCTION

The following is a summary of certain material federal income tax consequences of acquiring, holding and disposing of Shares. Because the federal income tax consequences of investing in the Fund may vary from Shareholder to Shareholder depending on each Shareholder's unique federal income tax circumstances, this summary does not attempt to discuss all of the federal income tax consequences of such an investment. Among other things, except in certain limited cases, this summary does not purport to deal with persons in special situations (such as financial institutions, non U.S. persons, insurance companies, entities exempt from federal income tax, regulated investment companies, dealers in commodities and securities and pass through entities). Further, to the limited extent this summary discusses possible foreign, state and local income tax consequences; it does so in a very general manner. Finally, this summary does not purport to discuss federal tax consequences (such as estate and gift tax consequences) other than those arising under the federal income tax laws. ***You are therefore urged to consult your tax advisers to determine the federal, state, local and foreign tax consequences of acquiring, holding and disposing of Shares.***

The following summary is based upon the Code as well as administrative regulations and rulings and judicial decisions thereunder, as of the date hereof, all of which are subject to change at any time (possibly on a retroactive basis). Accordingly, no assurance can be given that the tax consequences to the Fund or Shareholders will continue to be as described herein.

The Fund has not sought or obtained a ruling from the IRS (or any other federal, state, local or foreign governmental agency) or an opinion of legal counsel as to any specific federal, state, local or foreign tax matter that may affect it. Accordingly, although this summary is considered to be a correct interpretation of applicable law, no assurance can be given that a court or taxing authority will agree with such interpretation or with the tax positions taken by the Fund.

Except where specifically noted, this summary relates solely to U.S. Shareholders. A U.S. Shareholder for purposes of this discussion is a person who is a citizen or a resident alien of the U.S., a corporation (or other entity treated as a corporation for U.S. federal income tax purposes) organized under the laws of the U.S. or any political subdivision thereof, an estate whose income is subject to U.S. federal income tax regardless of its source or a trust if: (i) a U.S. court can exercise primary supervision over the trust's administration and one or more U.S. persons are authorized to control all substantial decisions of the trust or (ii) the trust has a valid election in effect under applicable Treasury Regulations to be treated as a U.S. person.

TAXATION OF THE FUND

The below is a summary of certain U.S. federal income tax considerations relevant under current law, which is subject to change. Except where otherwise specifically indicated, the discussion relates to investors who are individual U.S. citizens or residents. You should consult your own tax adviser regarding tax considerations relevant to your specific situation, including federal, state, local and non- U.S. taxes.

The Fund intends to qualify as a RIC for its tax year beginning November 1, 2023. The Fund qualified as a RIC for its tax year ended October 31, 2021, but failed to so qualify for its tax years ended October 31, 2022 and will fail to so qualify for its tax year ending October 31, 2023. If the Fund requalifies as a RIC, the Fund will generally not be subject to federal corporate income taxes, provided that it distributes out to Shareholders their taxable income and gain each year. To qualify for treatment as a RIC, the Fund must meet three important tests each year.

First, the Fund must derive with respect to each taxable year at least 90% of its gross income from dividends, interest, certain payments with respect to securities loans, gains from the sale or other disposition of stock or securities or foreign currencies, other income derived with respect to its business of investing in stock, securities or currencies, or net income derived from interests in qualified publicly traded partnerships (the "Income Test").

Second, generally, at the close of each quarter of its taxable year, at least 50% of the value of the Fund's assets must consist of cash and cash items, U.S. government securities, securities of other RICs, and securities of other issuers (as to which the Fund has not invested more than 5% of the value of its total assets in securities of the issuer and as to which the Fund does not hold more than 10% of the outstanding voting securities of the issuer), and no more than 25% of the value of the Fund's total assets may be invested in the securities of (1) any one issuer (other than U.S. government securities and securities of other regulated investment companies), (2) two or more issuers that the Fund controls and which are engaged in the same or similar trades or businesses, or (3) one or more qualified publicly traded partnerships (the "Diversification Test").

Third, the Fund must distribute an amount equal to at least the sum of 90% of its investment company taxable income (net investment income and the excess of net short-term capital gain over net long-term capital loss) and 90% of its net tax-exempt interest income, if any, for the year.

For tax years in which the Fund meets the Income Test and the Diversification Test, the Fund intends to comply with this distribution requirement. If the Fund were to fail to make sufficient distributions, it could be liable for corporate income tax and for excise tax in respect of the shortfall or, if the shortfall is large enough, the Fund could be disqualified as a RIC.

For the Fund's tax year ended October 31, 2022, the Fund's tax year ending October 31, 2023, and for any other taxable year of the Fund in which the Fund does not qualify as a RIC (each aforementioned year, a "Non-Qualifying Year"), all its taxable income is or will be subject to tax at regular corporate rates without any deduction for distributions to

Shareholders. For distributions made by the Fund during Non-Qualifying Years, all taxable Shareholders would recognize dividend income on distributions to the extent of the Fund's current and accumulated earnings and profits, although Shareholders that are corporations could be eligible for the dividends-received deduction.

The Code imposes a nondeductible 4% excise tax on RICs that fail to distribute each year an amount equal to specified percentages of their ordinary taxable income and capital gain net income (excess of capital gains over capital losses). The Fund intends to make sufficient distributions or deemed distributions each year to avoid liability for this excise tax in all years in which the Fund qualifies as a RIC ("RIC Years"), although no assurance can be given that this will always be accomplished.

Distributions To Shareholders. The Fund contemplates declaring as dividends each year all or substantially all of its taxable income. In general, distributions will be taxable to you for federal, state and local income tax purposes unless you are a tax-exempt entity, including qualified retirement plans or individual retirement accounts. Distributions are taxable whether they are received in cash or reinvested in Fund Shares. A shareholder may thus recognize income and gains taxable for federal, state and local income tax purposes without receiving any cash distributions to pay any resulting taxes on such income or gain.

Fund distributions, if any, that are attributable to "qualified dividend income" or "long-term capital gains" earned by the Fund would be taxable to non-corporate Shareholders at reduced rates. Shareholders must have owned the Fund Shares for at least 61 days during the 121 day period beginning 60 days before the ex-dividend date to benefit from the lower rates on qualified dividend income. In addition, to the extent the Fund designates dividends it pays to its shareholders as "section 199A dividends" such shareholder may be eligible for a 20% deduction with respect to such dividends. The amount of section 199A dividends that the Fund may pay and report to its shareholders is limited to the excess of the ordinary REIT dividends, other than capital gain dividends and portions of REIT dividends designated as qualified dividend income, that the Fund receives from REITs for a taxable year over the Fund's expenses allocable to such dividends. The Fund will provide notice to its shareholders of the amount of any distribution which may be taken into account as a dividend which is eligible for the capital gains tax rates or as section 199A dividends. Furthermore, U.S. individuals with modified adjusted gross income exceeding \$200,000 (\$250,000 for married couples filing jointly) and trusts and estates with income above specified levels are subject to an additional 3.8% tax on their net investment income, which includes interest, dividends, and capital gains.

Shareholders are generally taxed on any dividends from the Fund in the year they are actually distributed, except that dividends declared in October, November or December of a year, and paid in January of the following year, will generally be treated for federal income tax purposes as having been paid to Shareholders on December 31.

C Corporation Distributions. In Non-Qualifying Years, the Fund may reduce its distributions. Additionally, distributions that the Fund makes during Non-Qualifying Years are expected to be qualified dividends, and no underlying income character (such as long-term capital gain) would flow through to Shareholders. Moreover, Shareholders will not be eligible to benefit from section 199A with respect to dividends derived from underlying REITs in Non-Qualifying Years. Distributions made in January but declared in October, November, or December of a Non-Qualifying Year will not be treated for federal income tax purposes as having been paid to Shareholders on December 31.

Investments In Partnerships. The Fund will own interests in entities that are classified as partnerships for federal income tax purposes. As a partner in a partnership, the Fund will be required to recognize its allocable share of taxable income, if any, from the partnership, whether or not such income is actually distributed from the partnership to the Fund. Accordingly, the Fund may need to borrow money or dispose of its interests in underlying funds to make the required distributions in RIC Years. Additionally, the Fund may receive an allocation of items of income or deduction that

are tax preferences or adjustments to income for alternative minimum tax purposes which will be passed through to Fund's shareholders in RIC Years. For purposes of the Income Test, income that the Fund realizes from equity interests in entities that are classified as partnerships will generally have the same character for the Fund as in the hands of such an entity; consequently, the Fund may be required to limit its equity investments in any such entities that earn fee income, rental income, or other nonqualifying income. Additionally, private investment funds generally are not obligated to disclose the contents of their portfolios. This lack of transparency may make it difficult for the Fund to monitor the source of its income, and otherwise comply with Subchapter M of the Code, and ultimately may limit the universe of private investment funds in which the Fund may invest.

In RIC Years, the character of the income recognized by the Partnership flows through to the Fund including for purposes of determining whether at least 90% of the income of the Fund is qualifying income. Accordingly, if a Partnership derives income other than qualifying income, such income will not count toward meeting the 90% requirement.

Certain Withholding Taxes. The Fund may be subject to foreign withholding taxes on dividends from Investment Funds located in foreign countries, and the Investment Funds may be subject to taxes, including withholding taxes, attributable to investments of the Investment Funds. If at the close of a RIC Year more than 50% of the value of its assets consists of foreign stock or securities, the Fund will be eligible to elect, for federal income tax purposes, to treat certain foreign taxes paid by it, including generally any withholding and other foreign income taxes, as paid by its Shareholders. If the Fund so elects, the pro rata amount of such foreign taxes paid by the Fund will be included in its Shareholders' income and each such Shareholder will be entitled either (1) to credit that proportional amount of taxes against U.S. Federal income tax liability as a foreign tax credit or (2) to take that amount as an itemized deduction. The Fund does not expect to be able to make such election.

Sales, Exchanges and Redemptions. You will recognize taxable gain or loss on a sale, exchange or redemption of your shares in an amount equal to the difference between your tax basis in the shares and the amount you receive for them. Generally, this gain or loss will be long-term or short-term depending on whether your holding period exceeds twelve months. Additionally, any loss realized on a disposition of shares of the Fund may be disallowed under "wash sale" rules to the extent the shares disposed of are replaced with other shares of the Fund within a period of 61 days beginning 30 days before and ending 30 days after the shares are disposed of, such as pursuant to a dividend reinvestment in shares of the Fund. If disallowed, the loss will be reflected in an upward adjustment to the basis of the shares acquired.

The Fund is required to compute and report the cost basis share sold or exchanged. The Fund has elected to use the first in, first out ("FIFO") method, unless you instruct the Fund to select a different method, or choose to specifically identify your shares at the time of each sale or exchange. If your account is held by your broker or other advisor, they may select a different method. In these cases, please contact the holder of your shares to obtain information with respect to the available methods and elections for your account. You should carefully review the cost basis information provided by the Fund and make any additional basis, holding period or other adjustments that are required when reporting these amounts on your federal and state income tax returns.

Pursuant to the Regulations directed at tax shelter activity, taxpayers are required to disclose to the Internal Revenue Service certain information on IRS Form 8886 if they participate in a "reportable transaction." A transaction may be a "reportable transaction" based upon any of several indicia with respect to a shareholder, including the recognition of a loss in excess of certain thresholds (for individuals, \$2 million in one year or \$4 million in any combination of years). Investors should consult their own tax advisers concerning any possible disclosure obligation with respect to their investment in Fund Shares.

IRAs and Other Tax Qualified Plans. In general, dividends received and gain or loss realized with respect to shares held in an IRA or other tax qualified plan are not currently taxable unless the Fund Shares were acquired with borrowed funds.

U.S. Tax Treatment of Foreign Shareholders. Nonresident aliens, foreign corporations and other foreign investors in the Fund will generally be exempt from U.S. federal income tax on Fund distributions attributable to net capital gains. The exemption may not apply, however, if the investment in the Fund is connected to a trade or business of the foreign investor in the United States or if the foreign investor is present in the United States for 183 days or more in a year and certain other conditions are met.

Fund distributions attributable to other categories of Fund income, such as interest, and dividends from companies whose securities are held by the Fund, will generally be subject to a 30% withholding tax when paid to foreign shareholders. However, the Fund may be able to designate a portion of the distributions made as interest related dividends or short-term capital gain dividends which are generally exempt from this withholding tax. The withholding tax may, however, be reduced (and, in some cases, eliminated) under an applicable tax treaty between the United States and a shareholder's country of residence or incorporation, provided that the shareholder furnishes the Fund with a properly completed IRS Form W-8BEN or W-BEN-E, as applicable, to establish entitlement to these treaty benefits.

A foreign investor will generally not be subject to U.S. tax on gains realized on sales or exchanges of Fund shares unless the investment in the Fund is connected to a trade or business of the investor in the United States or if the investor is present in the United States for 183 days or more in a year and certain other conditions are met.

Under the Foreign Investment in Real Property Tax Act of 1980 ("FIRPTA"), a non-U.S. Shareholder is subject to withholding tax in respect of a disposition of a U.S. real property interest and any gain from such disposition ("FIRPTA gain") is subject to U.S. federal income tax as if such person were a U.S. person. If the Fund is a "U.S. real property holding corporation", is regularly traded on an established securities market, and is not domestically controlled, then any gain realized on the sale or exchange of Fund shares by a foreign Shareholder that owns at any time during the five-year period ending on the date of disposition more than 5% of a class of Fund shares would be FIRPTA gain. If the Fund were not to be treated as regularly traded on an established securities market, then such gain would be FIRPTA gain for all foreign Shareholders. A "U.S. real property holding corporation" is a corporation if, in general, 50% or more of the fair market value of its assets consists of U.S. real property interests, including stock of certain U.S. REITs and other corporations holding real property.

The Code also provides a look-through rule for distributions of FIRPTA gain by an a corporation such as the Fund if: (i) the Fund is classified as a "qualified investment entity" (which includes a RIC if, in general, more than 50% of the RIC's assets consist of interest in REITs and U.S. real property holding corporations); and (ii) you are a non-U.S. Shareholder that owns more than 5% of the Fund's Shares at any time during the one-year period ending on the date of the distribution. If these conditions are met, Fund distributions to you to the extent derived from gain from the disposition of a U.S. real property interest may also be treated as FIRPTA gain and therefore subject to U.S. federal income tax and requiring you to file a nonresident U.S. income tax return. Also, such gain may be subject to a 30% branch profits tax in the hands of a non-U.S. Shareholder that is a corporation. For non-U.S. Shareholders that do not own more than 5% of the Fund's shares, Fund distributions that are attributable to gain from the sale or disposition of a U.S. real property interest will be taxable as ordinary dividends subject to withholding at a 30%, unless a lower treaty rate applies.

Foreign investors of the Fund also may be subject to "wash sale" rules to prevent the avoidance of the tax-filing and -payment obligations discussed above through the sale and repurchase of Fund shares.

In addition, the Fund will be required to withhold 30% tax on payments to foreign entities that do not meet specified information reporting requirements under the Foreign Account Tax Compliance Act, even if such distributions would otherwise be exempt from withholding.

All foreign investors should consult their own tax advisers regarding the tax consequences in their country of residence of an investment in the Fund.

State and Local Taxes. In addition to the U.S. federal income tax consequences summarized above, you may be subject to state and local taxes on distributions, sales, exchanges, and redemptions. State income taxes may not apply, however, to the portions of the Fund's distributions, if any, that are attributable to interest on U.S. government securities.

Investment in Domestic Subsidiaries

The Fund contemplates investing up to 25% of its assets in one or more U.S. subsidiaries to enable it to indirectly make investments that would not generate qualifying income for a RIC. Any net income that such a subsidiary recognizes will be subject to federal and state corporate income tax, but the dividends that the subsidiary pays to the Fund (i.e., those gains, net of the tax paid and any other expenses of the subsidiary, such as its management and advisory fees) will be eligible to be treated as "qualified dividend income" under the Internal Revenue Code. Although it is possible that multiple subsidiaries may be required to be aggregated for purposes of the 25% value limit described above, losses of one subsidiary will not offset income of another subsidiary.

Investment in Cayman Subsidiary

The investment of up to 25% of a fund's assets in a foreign subsidiary such as the Cayman Subsidiary is a structure that has been used by a number of RICs as a way of indirectly making investments that would not generate qualifying income if they were made directly by the RIC. Section 851(b) of the Code provides that income earned by a controlled foreign corporation (a "CFC"), such as the Cayman Subsidiary, will be treated as qualifying income for a RIC provided that CFC distributes those earnings out to the RIC each year. In 2019, the Department of Treasury and the IRS issued regulations that provide that the income from a foreign subsidiary that is a controlled foreign corporation is qualifying income for purposes of a fund remaining qualified as a RIC for U.S. federal income tax purposes (1) to the extent that the income is actually distributed by the foreign subsidiary to the RIC each year and (2) even if not distributed, to extent the income is derived with respect to the fund's business of investing in stock, securities or currencies. Accordingly, the Fund intends to cause the Cayman Subsidiary to make such distributions to the Fund each year, so that the income of the Cayman Subsidiary will be qualifying income for the Fund.

If, however, the IRS were to determine that income derived from the Fund's investment in the Cayman Subsidiary does not constitute qualifying income and if such positions were upheld by a court, or if future legislation or the Treasury Regulations were to adversely affect the tax treatment of such investments, the Fund might cease to qualify as a RIC and would be required to reduce its exposure to such investments which might result in difficulty in implementing its investment strategy. In that event, the Fund's taxable income would be subject to tax at the fund level at regular corporate tax rates (without reduction for distributions to shareholders) and to a further tax at the shareholder level when such income is distributed. In such an event, in order to re-qualify for taxation as a RIC, the Fund may be required to recognize unrealized gains, pay substantial taxes and interest and make certain distributions.

Taxation of the Cayman Subsidiary. There is, at present, no direct taxation in the Cayman Islands and interest, dividends and gains payable to the Cayman Subsidiary will be received free of all Cayman Islands taxes. The Cayman Subsidiary is registered as an "exempted company" pursuant to the Companies Law (as amended). The Cayman Subsidiary has applied for, and expects to receive, an undertaking from the Governor in Cabinet of the Cayman Islands

to the effect that, for a period of twenty years from the date of the undertaking, no law that thereafter is enacted in the Cayman Islands imposing any tax or duty to be levied on profits, income or on gains or appreciation, or any tax in the nature of estate duty or inheritance tax, will apply to any property comprised in or any income arising under the Cayman Subsidiary, or to the shareholders thereof, in respect of any such property or income.

Information Reporting and Backup Withholding. Under applicable “backup withholding” requirements, the Fund may be required in certain cases to withhold and remit to the IRS a percentage of taxable dividends or gross proceeds realized upon sale payable to shareholders who have failed to provide a correct tax identification number in the manner required, or who are subject to withholding by the IRS for failure to properly include on their return payments of taxable interest or dividends, or who have failed to certify to the Fund that they are not subject to backup withholding when required to do so or that they are “exempt recipients.” The amount of any backup withholding from a payment to a Shareholder will be allowed as a credit against the Shareholder’s U.S. federal income tax liability and may entitle such a Shareholder to a refund, provided that the required information is timely furnished to the IRS.

OTHER TAX MATTERS

The preceding is a summary of some of the tax rules and considerations affecting Shareholders and the Fund’s operations, and does not purport to be a complete analysis of all relevant tax rules and considerations, nor does it purport to be a complete listing of all potential tax risks inherent in making an investment in the Fund. A Shareholder may be subject to other taxes, including but not limited to, state and local taxes, estate and inheritance taxes, and intangible taxes that may be imposed by various jurisdictions. The Fund also may be subject to state, local, and foreign taxes that could reduce cash distributions to Shareholders. It is the responsibility of each Shareholder to file all appropriate tax returns that may be required. Each prospective Shareholder is urged to consult with his or her tax adviser with respect to any investment in the Fund.

ERISA AND CODE CONSIDERATIONS

Persons who are fiduciaries with respect to one or more employee benefit plans subject to the Employee Retirement Income Security Act of 1974, as amended (“ERISA”) (such plans being “ERISA Plans”), as well as owners or other fiduciaries with respect to individual retirement accounts and annuities (“IRAs”), Keogh plans and similar arrangements, should consider, among other things, the matters described below before determining whether to invest in the Fund.

Without limitation, ERISA Plans generally include pension, profit sharing, 401(k), 403(b) and welfare benefit plans, which are established or maintained by private employers, including plans maintained jointly by private employers and unions, as well as SEP-IRA and SIMPLE IRA arrangements. ERISA imposes certain general and specific responsibilities on persons who are fiduciaries with respect to an ERISA Plan, including prudence, loyalty, diversification, adherence to governing documents, the avoidance of ERISA prohibited transactions (unless exempted), and other standards. In determining whether a particular investment is appropriate for an ERISA Plan, U.S. Department of Labor regulations provide that a fiduciary of the ERISA Plan must, within the scope of its responsibilities, give appropriate consideration to, among other things, the role that the investment plays in the ERISA Plan’s portfolio, whether the investment is designed reasonably to further the ERISA Plan’s purposes, the risk and return factors, the portfolio’s composition with regard to diversification, the liquidity and current total return of the portfolio relative to the anticipated cash flow needs of the ERISA Plan and the proposed investment, the income taxes (if any) attributable to the investment, and the projected return of the investment relative to the ERISA Plan’s funding objectives. Before investing the assets of an ERISA Plan in the Fund, an ERISA Plan fiduciary should determine whether such an investment is consistent with ERISA’s fiduciary responsibilities and the foregoing considerations. If a fiduciary with respect to any such ERISA Plan breaches such responsibilities with

regard to selecting an investment or an investment course of action for such ERISA Plan, the fiduciary may be held personally liable for losses incurred by the ERISA Plan as a result of such breach. Likewise, many ERISA Plans are also subject to the prohibited transaction rules of section 4975 of the Code, as discussed in the next paragraph.

IRAs (other than SEPs and SIMPLEs), Keogh plans, individual 401(k) plans and certain other plans that cover only owner-employees, partners of a partnership, and their respective spouses, as well as certain other tax-advantaged accounts, are generally not subject to ERISA, but are subject to the prohibited transaction rules of section 4975 of the Code (“Code Plans”), and thus their owners or other fiduciaries should determine whether an investment in the Fund will violate those rules.

In addition, depending on the particular circumstances, certain other accounts and entities in which one or more ERISA Plans and/or Code Plans directly or indirectly hold equity interests may be subject to some or all of the above rules. Specifically, where the underlying assets of such accounts or entities are deemed to constitute “plan assets” of ERISA Plans and/or Code Plans, persons who have or exercise certain discretionary powers, and persons who render investment advice for compensation with respect to their assets, will be considered fiduciaries to the respective ERISA Plans and/or Code Plans. In these cases, such fiduciaries may be subject to ERISA’s fiduciary responsibility rules and ERISA and/or the Code’s prohibited transaction rules, as applicable. Examples of such accounts and entities which may in some cases be deemed to hold “plan assets” include certain funds-of-funds, insurance company accounts and collective trust vehicles. For brevity, we refer to such accounts and entities whose underlying assets are deemed to constitute “plan assets,” together with ERISA Plans and Code Plans, as “Plan Investors.”

Investments by ERISA Plans and Code Plans in investment companies registered under the Investment Company Act, publicly-offered securities and operating companies should not result in such entities’ underlying assets being deemed to constitute “plan assets.”

Because the Fund will be registered as an investment company under the Investment Company Act, the underlying assets of the Fund will not be considered “plan assets” of the Plan Investors investing in the Fund for purposes of ERISA’s fiduciary responsibility rules and ERISA and the Code’s prohibited transaction rules. Thus, the Investment Manager will not be a fiduciary within the meaning of ERISA and the Code with respect to the assets of any Plan Investor that becomes a Shareholder of the Fund, solely as a result of the Plan Investor’s investment in the Fund.

Certain prospective Plan Investors may currently maintain relationships with the Investment Manager or one or more Underlying Managers of the Investment Funds in which the Fund invests, or with other entities that are affiliated with the Investment Manager such Underlying Managers. Each of such persons may be deemed to be a party in interest to, a disqualified person of, and/or a fiduciary of any Plan Investor to which it provides investment management, investment advisory, or other services. Among other things, ERISA and the Code prohibit Plan assets from being used for the benefit of a party in interest or disqualified person and also prohibit a fiduciary from using its position to cause the Plan to make an investment from which it or certain third parties in which such fiduciary has an interest would receive a fee or other consideration, unless an exemption to such prohibited transaction applies. Plan Investors should consult with legal counsel to determine if participation in the Fund is a transaction that is prohibited by ERISA or the Code. Fiduciaries of Plan Investors, including IRA owners, will be required to represent that the decision to invest in the Fund was made by them as fiduciaries that are independent of such affiliated persons, that they are duly authorized to make such investment decisions, and that they have not relied on any individualized advice or recommendation of such affiliated persons as a primary basis for the decision to invest in the Fund.

The provisions of ERISA and the Code are subject to extensive and continuing administrative and judicial interpretation and review. The discussion of ERISA and the Code contained herein is, of necessity, general and may be affected by the future publication or the future applicability of final regulations and rulings. Potential investors should consult with their legal advisers regarding the consequences under ERISA and the Code of the acquisition and ownership of Shares. In addition, certain other plans, including for example governmental plans, ERISA-exempt church plans and bona fide “top-hat” deferred compensation plans, while not subject to ERISA or the prohibited transaction rules under section 4975 of the Code, may nonetheless be subject to similar rules and restrictions arising under other sources of law, and should consider the application of such other laws before investing in the Fund.

INVESTOR QUALIFICATIONS

Each prospective investor in the Fund will be required to certify that it is an “accredited investor” within the meaning of Rule 501 under the Securities Act. The criteria for qualifying as an “accredited investor” are set forth in the investor application that must be completed by each prospective investor. Investors who meet such qualifications are referred to in this Prospectus as “Eligible Investors.” Existing Shareholders who request to purchase additional Shares (other than in connection with the DRIP) will be required to qualify as “Eligible Investors” and to complete an additional investor application prior to the additional purchase.

PURCHASING SHARES

PURCHASE TERMS

The minimum initial investment in the Fund by any investor is \$25,000, and the minimum additional investment in the Fund by any Shareholder is \$10,000. However, the Fund, in its sole discretion, may accept investments below these minimums. Shares are only available to the Adviser’s clients, charitable organizations that the Adviser’s clients wish to designate as recipients of shares, the Adviser’s current employees, current employees joint accounts and revocable trusts with their spouse, current and former owners of the Adviser including their joint accounts and revocable trusts with their spouse, members of the Adviser’s board, and members of the Trust’s Board of Trustees (the “Board”). Shares may be purchased by partners and employees of the Investment Manager or their affiliates and its immediate family members without being subject to the minimum investment requirements. The Shares will be issued at the NAV per Share as of the date such Shares are purchased.

Shares will generally be offered for purchase as of the first business day of each calendar quarter, except that Shares may be offered more or less frequently as determined by the Board in its sole discretion. The Board may also suspend or terminate offerings of Shares at any time.

The Fund has authorized one or more brokers to receive on its behalf purchase orders. Such brokers are authorized to designate other intermediaries to receive purchase orders on the Fund’s behalf. The Fund will be deemed to have received a purchase order when an authorized broker, or if applicable, a broker’s authorized designee, receives the order. Customer orders will be priced at the Fund’s NAV next computed after they are received by an authorized broker or the broker’s authorized designee.

Except as otherwise permitted by the Board, initial and subsequent purchases of Shares will be payable in cash. Each initial or subsequent purchase of Shares will be payable in one installment which will generally be due (i) four business days prior to the date of the proposed acceptance of the purchase set by the Fund, which is expected to be the last day of each calendar quarter (the “Acceptance Date”), where funds are remitted by wire transfer, or (ii) ten business days

prior to the Acceptance Date, where funds are remitted by check. A prospective investor must also submit a completed investor application at least five business days before the Acceptance Date. The Fund reserves the right, in its sole discretion, to accept or reject any subscription to purchase Shares in the Fund at any time. Although the Fund may, in its sole discretion, elect to accept a subscription prior to receipt of cleared funds, an investor will not become a Shareholder until cleared funds have been received. In the event that cleared funds and/or a properly completed investor application are not received from a prospective investor prior to the cut-off dates pertaining to a particular offering, the Fund may hold the relevant funds and investor application for processing in the next offering.

Pending any offering, funds received from prospective investors will be placed in an escrow account with UMB Bank, n.a., the Fund's escrow agent. On the date of any closing, the balance in the escrow account with respect to each investor whose investment is accepted will be invested in the Fund on behalf of such investor. In general, an investment will be accepted if the investor meets the Fund's eligibility requirement and a completed investor application and funds are received in good order on or prior to the Acceptance Date set by the Fund. The Fund reserves the right to reject, in its sole discretion, any request to purchase Shares in the Fund at any time. For any investor whose investment is not accepted, the balance in the escrow account with respect to such investor will be returned to the investor. Any interest earned with respect to escrow accounts will be paid to the Fund.

TERM, DISSOLUTION AND LIQUIDATION

The Fund may be dissolved upon approval of a majority of the Trustees. Upon the liquidation of the Fund, its assets will be distributed first to satisfy (whether by payment or the making of a reasonable provision for payment) the debts, liabilities and obligations of the Fund, including actual or anticipated liquidation expenses, other than debts, liabilities or obligations to Shareholders, and then to the Shareholders proportionately in accordance with the amount of Shares that they own. Assets may be distributed in-kind on a proportionate basis if the Board or liquidator determines that the distribution of assets in-kind would be in the interests of the Shareholders in facilitating an orderly liquidation.

REPORTS TO SHAREHOLDERS

The Fund will furnish to Shareholders as soon as practicable after the end of each of its taxable years such information as is necessary for them to complete U.S. federal and state income tax or information returns, along with any other tax information required by law. The Fund anticipates providing Shareholders an unaudited semi-annual and an audited annual report within 60 days after the close of the period for which the report is being made, or as otherwise required by the Investment Company Act. Shareholders also will be provided reports regarding the Fund's operations each quarter.

FISCAL YEAR

The Fund's fiscal year is the 12-month period ending on March 31. The Fund's taxable year is the 12-month period ending on October 31.
